

LUTZE

USA Cable Solutions for Industrial Automation

Control Cable
Electronic Cable
BUS and Network Cable
Motor Supply, VFD, Servo and Feedback Cable
Wire and Cable Management
Network Connectivity

SYSTEMATIC TECHNOLOGY

LUTZE cable, connectivity and wire management solutions for industrial automation

DESINA

RoHS

REACH

UL approvals

NFPA 79 compliant cables

Designed for the North American market

Standard size reels available in stock

We cut cable to any length compliant with "UL processed wire respooled" procedure

No minimum length required for standard items

Low minimum order

Our goal is "On Time-All the Time"

SYSTEMATIC TECHNOLOGY

Efficiency in Automation

Cable • Connectivity • Cabinet • Control

Your ultimate partner in cable and connectivity products for industrial automation. Our products are designed for harsh environments and carry multiple approvals for code compliance. This gives you peace of mind and allows you to stay focused on your projects.

NEC – regulates the field level

NFPA 79 – regulates the machine level

UL 508A – regulates the cabinet level

SYSTEMATIC TECHNOLOGY

Part Number Index 125

1. Control Cables

LUTZE SILFLEX® Control Cable PVC, Unshielded

Flexible Control and Tray Cable for Stationary Applications

Application

- Multi-conductor cable for tray and control applications, with exposed run (open wiring) approval
- Machine tools, machine and plant construction, HVAC technology, assembly and production lines, and other industrial applications
- Compliant with NFPA 79 requirements
- TC-ER-JP for use with cable trays without conduit, which can reduce installation costs in industrial environments
- WTTC – wind turbine tray cable rating for use in wind power generation
- PLTC-ER – power limited tray cable exposed run
- ITC-ER – instrumentation tray cable
- Dry, damp or wet locations

Characteristics

- Crush impact resistant
- Gas/vapor-tight sheath per UL 1277
- Non-wicking fillers
- Sunlight resistant
- Flame retardant
- Direct burial (AWG 18 and larger)
- Talc and silicone free

Technical Data

Voltage	
AWG 20:	300V 90C PLTC-ER 300V 90C ITC-ER 600V MTW 1000V 80C AWM

LUTZE SILFLEX® Control Cable (C) PVC, Shielded

Flexible Control and Tray Cable for Stationary Applications

Application

- Dual-shielded multi-conductor cable for tray and control applications, with exposed run (open wiring) approval
- Machine tools, machine and plant construction, HVAC technology, assembly and production lines, and other industrial applications
- Compliant with NFPA 79 requirements
- TC-ER-JP for use with cable trays without conduit, which can reduce installation costs in industrial environments
- WTTC – wind turbine tray cable rating for use in wind power generation
- PLTC-ER – power limited tray cable exposed run
- ITC-ER – instrumentation tray cable
- Dry, damp or wet locations

Characteristics

- Crush impact resistant
- Gas/vapor-tight sheath per UL 1277
- Non-wicking fillers
- Sunlight resistant
- Flame retardant
- Direct burial (AWG 18 and larger)
- Talc and silicone free

LUTZE SILFLEX® Tray-ER TPE, Unshielded

Flexible Premium TPE Control and Tray Cable for Stationary Applications

Application

- Multi-conductor cable for tray applications, with exposed run (open wiring) approval
- Metal cutting equipment, machine tools, machine and plant construction, HVAC technology, assembly and production lines, and other industrial applications
- Compliant with NFPA 79 requirements
- TC-ER for use with cable trays without conduit, which can reduce installation costs in industrial environments
- WTTC – wind turbine tray cable rating for use in wind power generation
- Dry, damp and wet locations

Characteristics

- Crush impact resistant
- Gas/vapor-tight sheath per UL 1277
- Cutting oil resistant - mineral & bio/vegetable based oils *specifically tested with plant based cutting oil*
- Non-wicking fillers
- Sunlight resistant
- Flame retardant
- Talc and silicone free

Technical Data

Voltage	600V 90C TC-ER 1000V 90C WTTC 600V MTW 600V 105C AWM
Temperature range	-40°C - +105°C static
Bending radius min	4 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground *2C no ground included
Oil resistance	Oil Res I, Oil Res II
Approvals	UL Type TC-ER *2C UL Type TC UL/CE (UL) Type MTW or DP-1 UL1277 WTTC Meets NEC 336, 392 Class I & II, Div. 2 and Class I Zone 2 per NEC 501, 502, 505 AWM 21270 c(UL) TC and CIC FT4 RoHS, REACH
Item specific approvals	UL509 BUS Drop (only 4 or 5 conductors incl. ground)

Construction

- AWG conductor
- Flexible fine wire stranded bare copper conductors
- PVC/Nylon insulation
- Extremely oil resistant TPE jacket
- Black jacket similar to RAL 9005

Specifications are subject to change without prior notice

Construction

- AWG conductor
- Flexible fine wire stranded bare copper conductors
- PVC/Nylon insulation
- Shielded with foil tape, tinned copper braid and drain wire
- Extremely oil resistant TPE jacket
- Black jacket similar to RAL 9005

Specifications are subject to change without prior notice

LUTZE SILFLEX® Tray-ER Blue PVC, Unshielded

Flexible Control and Tray Cable with Blue Conductors for 24V Applications

Application

- Multi-conductor cable for tray applications, with exposed run (open wiring) approval
- Machine tools, machine and plant construction, HVAC technology, assembly and production lines, and other industrial applications
- Compliant with NFPA 79 requirements
- Blue conductors indicating 24 Volt circuits
- MTW for machine tool wiring
- TC-ER for use with cable trays without conduit, which can reduce installation costs in industrial environments
- Dry, damp and wet conditions

Characteristics

- Crush impact resistant
- Gas/vapor-tight sheath per UL 1277
- Non-wicking fillers
- Sunlight resistant
- Flame retardant
- Direct burial
- Talc and silicone free

Technical Data

Voltage	600V 90C TC-ER 600V MTW
Temperature range	-40°C - +90°C static
Bending radius min	4 x cable OD
Conductor marking	Blue with white numbers; and one green/yellow ground; No. 2 is white with a blue stripe *only two blue with white numbers and one green/yellow ground, no white with a blue stripe
Oil resistance	Oil Res I
Approvals	UL Type TC-ER UL/CE (UL) Type MTW or DP-1 Meets NEC 336, 392 Class I & II, Div. 2 and Class I Zone 2 per NEC 501, 502, 505 c(UL) TC and CIC FT4 UL1277 RoHS, REACH

Construction

- AWG conductor
- Flexible fine wire stranded bare copper conductors
- PVC/Nylon insulation
- Oil resistant PVC jacket
- Gray jacket similar to RAL 7001

Specifications are subject to change without prior notice

"Blue conductors are used to indicate 24V DC circuits. The cable is rated 600V TC-ER to permit installation alongside other type TC cables".

LUTZE SILFLEX® N PVC, Unshielded

Flexible Control Cable for Stationary Applications

Application

- Multi-conductor control cable for machine and plant construction, HVAC technology, assembly and production lines, and many other industrial applications
- Easy strip design especially suited for cable assemblies
- Compliant with NFPA 79, Article 12.9

Characteristics

- Most flexible design without nylon for easy stripping and easy installation
- Easy routing and bending due to flexibility
- Resistant to mineral oils, coolants and solvents
- Non-wicking fillers
- Talc and silicone free

Technical Data

Voltage	600V 90C AWM
Temperature range	-40°C - +90°C static
Bending radius min	4 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground;
	*2C no ground included
Burning behavior	Flame retardant per UL VW-1
Oil resistance	Oil Res II
Approvals	UL AWM Style 2587 FT4 CE RoHS, REACH

Construction

- AWG conductor
- Flexible fine wire stranded bare copper conductors
- PVC insulation
- Oil resistant PVC jacket
- Gray jacket similar to RAL 7001

Specifications are subject to change without prior notice

LUTZE Single Conductor Hook Up Wire, Multi-Norm

Flexible Single Conductor Hook Up Wire with UL/CE/MTW and HAR Approvals

Application

- Multi-rated single-conductor cable for wiring of cabinets and use in electrical and electronic equipment
- Suited for use in Europe (HAR) and North America (UL MTW)
- MTW for machine tool wiring

Characteristics

- Fine stranding class 5, per VDE 0295
- Very flexible for easy installation
- Talc and silicone free

Technical Data

Voltage	H05V2-K 300/500V, H07V2-K 450/750V, 600V MTW
Test voltage	600V 105C AWM 3000V
Bending radius min	Fixed: 5 x cable OD
Temperature range	Flexible -5°C - +105°C Fixed -40°C - + 105°C H05/H07 up to +90°C
Conductor stranding	Fine wire, tinned copper per VDE 0295 class 5, IEC 60228 class 5
Insulation resistance	20MΩ x km
Burning behavior	Flame retardant per UL VW-1, IEC 60332-1
Approvals	HAR: HD 21.3 S3 - H05V-K (≤ AWG 18) - H07V-K (≥ AWG 16) UL 1063 MTW Listed UL AWM 1015 RoHS, REACH
Put ups	AWG 19 – AWG 12 100m (328ft) carton or ring 500m (1,640ft) reel upon request AWG 10 and larger Cuts of any length up to 1,000m (3,280ft) reel

Construction

- Metric conductor
- Flexible stranded tinned copper conductors
- PVC insulation according to UL 1581, class 43 heat and humidity resistant
- Conditionally resistant to oils, solvents, acids and bases

More colors and sizes upon request. Please contact us for information!

LUTZE Single Conductor Hook Up Wire, Multi-Norm

Flexible Single Conductor Hook Up Wire with UL/CE/MTW and HAR Approvals

Application

- Multi-rated single-conductor cable for wiring of cabinets and use in electrical and electronic equipment
- Suited for use in Europe (HAR) and North America (UL MTW)
- MTW for machine tool wiring

Characteristics

- Fine stranding class 5, per VDE 0295
- Very flexible for easy installation
- Talc and silicone free

Technical Data

Voltage	H05V2-K 300/500 V, H07V2-K 450/750 V, 600V 90C MTW 600V 105C AWM
Test voltage	3000V
Bending radius min	Fixed: 5 x cable OD
Temperature range	Flexible -5°C - +105°C Fixed -40°C - + 105°C H05/H07 up to +90°C
Conductor stranding	Fine wire, tinned copper per VDE 0295 class 5, IEC 60228 class 5
Insulation resistance	20MΩ x km
Burning behavior	Flame retardant per UL VW-1, IEC 60332-1
Approvals	HAR: HD 21.3 S3 - H05V-K (≤ AWG 18) - H07V-K (≥ AWG 16) UL 1063 MTW Listed UL AWM 1015 RoHS, REACH
Put ups	AWG 19 – AWG 12 100m (328ft) carton or ring 500m (1,640ft) reel upon request AWG 10 and larger Cuts of any length up to 1,000m (3,280ft) reel

Construction

- Metric conductor
- Flexible stranded tinned copper conductors
- PVC insulation according to UL 1581, class 43 heat and humidity resistant
- Conditionally resistant to oils, solvents, acids and bases

More colors and sizes upon request. Please contact us for information!

LUTZE SUPERFLEX® N PVC, Unshielded

High Flexing Control Cable for Continuous Motion Applications

Application

- Suitable for control, monitoring and instrumentation applications with continuous flexing cycles
- For flexing applications such as drag chains and other applications where linear flexing occurs
- Compatible with all major drag chain brands
- Compliant with NFPA 79, Article 12.9

Characteristics

- Extremely small cable ODs due to special TPE High Glide insulation compliant with UL
- TPE/PVC combination for high performance flexing and longer cable runs
- Very flexible with superfine stranding
- Specially formulated PVC jacket per UL Class 43
- Non-wicking fillers
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe and rot resistant
- UV resistant according to UL 1581
- Dry and wet conditions
- Talc and silicone free

Technical Data

Voltage	600V 105C AWM
Test voltage	3000V
Insulation resistance	Min 100 MΩ x km
Temperature range	Moving -15°C - +90°C Fixed -40°C - +105°C
Bending radius min	Moving 7.5 x cable OD Fixed 4 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground
Burning behavior	Flame retardant per UL VW-1, DIN EN 50265-2-1 FT1
Oil resistance	4D100C, UL Oil res 80°C and DIN EN 60811-2-1
Approvals	cUL AWM Style 2586 CE RoHS, REACH

Construction

- Metric conductor
- Bare copper super finely stranded per DIN VDE 0295 Class 6 and IEC 60228 Class 6
- Special TPE conductor insulation
- G: with GNYE ground conductor
- Optimized construction for flexing applications
- Conductors cabled with fleece wrap
- Special high strength PVC jacket per UL class 43 / VDE 0207 TM5, oil resistant
- Gray jacket similar to RAL 7001

LUTZE SUPERFLEX® N (C) PVC, Shielded

High Flexing Control Cable for Continuous Motion Applications

Application

- Shielded multi-conductor high flexing cable suitable for control, monitoring and instrumentation applications with continuous flexing in drag chains
- Machine tools, gantry robots, conveyors and other continuous motion applications in industrial environments
- For flexing applications such as drag chains and other applications where linear flexing occurs
- Compatible with all major drag chain brands
- Compliant with NFPA 79, Article 12.9

Characteristics

- Extremely small cable ODs due to special TPE High Glide insulation compliant with UL
- Sub-jacket for increased flex life in high performance flexing and long cable runs
- Very flexible with superfine stranding
- Specially formulated PVC jacket per UL Class 43
- Non-wicking fillers
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe and rot resistant
- UV resistant according to UL 1581
- Dry and wet conditions
- Talc and silicone free

LUTZE SUPERFLEX® Plus N PUR, Unshielded

High Flexing Control Cable for Continuous Motion Applications

Application

- Multi-conductor cable for robots, handling equipment, machine tools, drag chains and applications with extremely rough operating conditions
- For the most demanding flexing applications such as drag chains and linear flexing
- Compatible with all major drag chains brands
- Compliant with NFPA 79, Article 12.9

Characteristics

- Superfine stranding per Class 6 for continuous moving applications
- Extremely small cable ODs due to special TPE High Glide insulation compliant with UL
- Reduced friction
- PUR jacket
- Highest level of resistance against cooling fluids, greases and oils
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe, and rot resistant
- Dry and wet conditions
- UV resistant
- Non-wicking fillers
- Talc and silicone free

Technical Data

Voltage	300/600V 80C AWM
Temperature range	Moving -25°C - +80°C Fixed -40°C - +80°C
Bending radius min	Moving 7.5 x cable OD Fixed 4 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground; *no ground included
Insulation resistance	Min 100MΩ x km
Burning behavior	Flame retardant per DIN EN 60332-1-2 IEC 60332-1 UL VW-1 FT1
Halogen free	According to DIN EN 60754-1
Oil resistance	Oil Res II
Approvals	RoHS, REACH

Construction

- Metric conductor
- Bare copper wire super finely stranded per DIN VDE 0295 Class 6 and IEC 60228 Class 6
- Special TPE conductor insulation
- G: with GNYE ground conductor
x: without ground conductor
- Optimized construction for flexing applications
- Conductors cabled with fleece wrap
- Extremely oil resistant PUR jacket
- Gray jacket similar to RAL 7001

LUTZE ELECTRONIC LIYY 10650 1000

Lot No 117043

LUTZE Electronic PLTC PVC, Unshielded

Flexible Electronic Cable for Stationary Applications

Application

- Multi-conductor industrial grade PLTC electronic cable
- Machine tools, machine and plant construction, HVAC technology, assembly and production lines, process instrumentation and controls
- Compliant with NFPA 79 requirements
- PLTC for installation in cable trays

Characteristics

- Flexible for easy installation
- Easy strip design
- Color coded conductors
- Specially formulated jacket for oil resistance
- Premium durability
- Extended temperature range
- Sunlight resistant
- Gas/vapor-tight sheath per UL 13
- Talc and silicone free

Technical Data

Voltage	300V
Temperature range	-40°C - +105°C
Bending radius min	4 x cable OD
Conductor marking	See tables
Burning behavior	Flame retardant per UL VW-1, FT4
Oil resistance	Oil Res II
Approvals	UL Type PLTC UL Type CM AWM 2464 80C 300V AWM I/II A/B CE Meets NEC 392, 725, 800 Class I & II, Div. 2 and Class I Zone 2 per NEC 501, 502, 505 (PLTC Use Only) UL 13 RoHS, REACH

Construction

- AWG conductor
- Flexible fine wire stranded tinned copper conductors
- SR-PVC insulation
- Oil resistant premium PVC jacket
- Gray jacket similar to RAL 7001

LUTZE Electronic PLTC (C) PVC, Shielded

Flexible Electronic Cable for Stationary Applications

Application

- Dual-shielded multi-conductor industrial grade PLTC electronic cable
- Machine tools, machine and plant construction, HVAC technology, assembly and production lines, process instrumentation and controls
- Compliant with NFPA 79 requirements
- PLTC for installation in cable trays

Characteristics

- Flexible for easy installation
- Easy strip design
- Color coded conductors
- Specially formulated jacket for oil resistance
- Premium durability
- Extended temperature range
- Sunlight resistant
- Gas/vapor-tight sheath per UL 13
- Talc and silicone free

Technical Data

Voltage	300V
Temperature range	-40°C - +105°C
Bending radius min	4 x cable OD
Conductor marking	See tables
Burning behavior	Flame retardant per UL VW-1, FT4
Oil resistance	Oil Res II
Approvals	UL Type PLTC UL Type CM AWM 2464 80C 300V AWM II A/B CE Meets NEC 392, 725, 800 Class I & II, Div. 2 and Class I Zone 2 per NEC 501, 502, 505 (PLTC Use Only) UL 13 RoHS, REACH

Construction

- AWG conductor
- Flexible fine wire stranded tinned copper conductors
- SR-PVC insulation
- Shielded with foil tape, tinned copper braid and drain wire
- Oil resistant premium PVC jacket
- Gray jacket similar to RAL 7001

Specifications are subject to change without prior notice

LUTZE SUPERFLEX® TRONIC PUR, Unshielded

High Flexing Electronic Cable for Continuous Motion Applications

Application

- Multi-conductor cable for robots, handling equipment, machine tools, drag chains and applications with extremely rough operating conditions
- For the most demanding flexing applications such as drag chains and linear flexing
- Compatible with all major drag chain brands
- Compliant with NFPA 79, Article 12.9

Characteristics

- Super finely stranded per Class 6 for continuous moving applications
- PUR jacket and TPE conductor insulation for use in extremely harsh operating conditions
- Highest level of resistance against cooling fluids, greases and oils
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe and rot resistant
- Dry, wet and damp conditions
- UV resistant
- Talc and silicone free

Technical Data

Voltage	300V
Temperature range	Moving -25°C - +80°C Fixed -40°C - +80°C
Bending radius min	Moving 10 x cable OD Fixed 6 x cable OD
Conductor marking	Color coded per DIN EN 50334 or DIN 47100
Insulation resistance	Min 100MΩ x km
Burning behavior	Flame retardant per DIN EN 60332-2-2 IEC 60332-2-2 UL 1581 FT-2
Halogen free	According to DIN EN 60754-1
Oil resistance	Oil Res II
Approvals	AWM 20549 80C 300V RoHS, REACH

Construction

- Metric conductor
- Bare copper super finely stranded per DIN VDE 0295 Class 6 or IEC 60228 Class 6
- TPE conductor insulation
- Layer pitch optimized
- Fleece wrap over cabled conductors
- PUR jacket, matte, adhesion-free surface
- Extremely oil resistant PUR jacket
- Gray jacket similar to RAL 7001

LUTZE SUPERFLEX® TRONIC (C) PUR TP, Shielded

High Flexing Electronic Cable for Continuous Motion Applications

Application

- Shielded multi-conductor cable for robots, handling equipment, machine tools, drag chains and applications with extremely rough operating conditions
- For the most demanding flexing applications such as drag chains and linear flexing
- Compatible with all major drag chain brands
- Compliant with NFPA 79, Article 12.9

Characteristics

- Super finely stranded per Class 6 for continuous moving applications
- PUR jacket and TPE conductor insulation for use in extremely harsh operating conditions
- Highest level of resistance against cooling fluids, greases and oils
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe and rot resistant
- Dry, wet and damp conditions
- UV resistant
- Non-wicking fillers
- Talc and silicone free

Technical Data

Voltage	300V
Temperature range	Moving -25°C - +80°C Fixed -40°C - +80°C
Bending radius min	Moving 12 x cable OD Fixed 6 x cable OD
Conductor marking	Color coded per DIN EN 50334 or DIN 47100 for twisted pairs
Insulation resistance	Min 100MΩ x km
Burning behavior	Flame retardant per DIN EN 60332-2-2 IEC 60332-2-2 UL 1581 FT-2
Halogen free	According to DIN EN 60754-1
Oil resistance	Oil Res II
Approvals	AWM 20549 80C 300V RoHS, REACH

Construction

- Metric conductor
- Bare copper super finely stranded per DIN VDE 0295 Class 6 and IEC 60228 Class 6
- Special TPE conductor insulation
- Layer pitch optimized
- Fleece wrap over cabled conductors
- Tinned copper braid shield, optical coverage ≥ 85 %
- PUR jacket, matte, adhesion-free surface
- Extremely oil resistant PUR jacket
- Gray jacket similar to RAL 7001

LUTZE SUPERFLEX® TRONIC AS PUR, Unshielded

High Flexing Actuator Sensor Cable for Continuous Motion Applications

Application

- Termination cable for actuator sensor applications
- For continuous flexing use in drag chains or free movement in automation technology, transport and conveyor technology, machine tool manufacturing
- Full PUR jacket and TPE conductor insulation optimally suited for extremely harsh operating conditions, aggressive coolants and lubricants
- Compatible with all major drag chain brands
- Compliant with NFPA 79, Article 12.9

Characteristics

- Very good alternating bending strength
- Good pressure and flexing stability
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe, and rot resistant
- Weathering, ozone and UV resistant
- Salt water resistant
- Excellent coolant and lubricant resistance
- Largely resistant to oils, greases, alcohol-free benzenes and kerosene
- Talc and silicone free

Technical Data

Voltage	300V
Test voltage	3000V
Insulation resistance	Min. 100MΩ x km
Temperature range	Moving -20°C - +80°C Fixed -40°C - +80°C
Bending radius min	Moving 8 x cable OD Fixed 4 x cable OD
Burning behavior	Flame retardant per DIN EN 60332-1-2 IEC 60332-1 UL 1581 section VW-1 FT1
Halogen free	According to DIN EN 60754-1
Approvals	AWM 20549 80C 300V RoHS, REACH

Construction

- Metric conductor
- Bare copper wire super finely stranded per DIN VDE 0295 class 6 and IEC 60228 class 6
- Special TPE conductor insulation
- G: with GNYE ground conductor
x: without ground conductor
- Conductors color coded per EN 60947-5-2
- Layer pitch optimized
- Fleece wrap over cabled conductors
- PUR jacket, matte, adhesion-free surface
- Black jacket similar to RAL 9005

Specifications are subject to change without prior notice

“Extra rugged actuator sensor cable for use in continuous motion applications such as drag chains”.

3. Bus and Network Cables

LUTZE PROFIBUS (C) PVC, Shielded

Flexible PROFIBUS Cable for Stationary Applications

Application

- For the cabling of industrial field bus systems like PROFIBUS DP, F.I.P.
- With solid conductor AWG22/1 for hard wiring or with stranded conductor for flexible use in stationary applications
- Automation technology, transport and conveyor technology, machine tool manufacturing
- Compliant with NFPA 79 requirements

Characteristics

- High protection against electromagnetic interference (EMI)
- Talc and silicone free

Technical data

Voltage	300V 600V AWM
Test voltage	1,500V, 50Hz
Impedance	150Ω ± 15Ω
Loop resistance	Solid 22/1 <110Ω/km Flexible 24/7 <175.2Ω/km
Operating capacitance	Nominal 30pF/m
Temperature range	Moving -10°C - +70°C Fixed -40°C - +75°C
Bending radius min	Moving 15 x cable OD Fixed 7.5 x cable OD
Burning behavior	Flame retardant per FT4, UL 1685, IEC 60332-3-24
Approvals	CMG 75C AWM 21694 60C 600V Meets NEC 392, 800 RoHS, REACH

Construction

- AWG conductor
- Bare copper wire
- Conductor insulation special polyolefin
- Stranding with filler
- Foil shield
- Tinned copper braid shield, optical coverage 85% (104293 inner jacket and 70% optical coverage)
- Special thermoplastic on PVC basis
- Violet jacket similar to RAL 4001

Specifications are subject to change without prior notice

LUTZE ETHERNET Light Industrial Duty PVC

Ethernet Cable for Stationary Applications

Application

- For the cabling of industrial Ethernet systems
- Cable design for industrial environments and operating conditions with low electrical noise levels
- For interconnection of automated equipment inside the factory environment
- For stationary applications
- Compliant with NFPA 79 requirements

Characteristics

- Oil, abrasion, and sunlight resistant
- Design and approvals for machine and field level
- Talc and silicone free

Technical data

Voltage	300V 600V AWM
Test voltage	2000V
Impedance	100Ω ± 10Ω
DC resistance	Max. 9.38Ω/100m
Operating capacitance	< 56pF/m
Temperature range	-40°C - +80°C
Bending radius min	7.5 x cable OD
Burning behavior	Flame retardant per UL 1666 (Riser)
Approvals	CMR 75C CMX Outdoor 75C AWM 21695 80C 600V UL 444 -40°C Cold Bend Meets NEC 392, 800 Sun Res RoHS, REACH
AWG specific approvals	
AWG 22:	PLTC Class I & II, Div. 2 and Class I Zone 2 per NEC 501, 502, 505

Construction

- AWG conductor
- Bare copper wire
- Conductor insulation HDPE
- Pairs cabled with cross shaped spline
- A1040001: U/UTP unshielded
- A1040005, A1040006: F/UTP foil shield 100% coverage
- Oil resistant PVC jacket
- Teal jacket similar to RAL 5021

LUTZE MOTIONFLEX® ETHERNET (C) TPE, Shielded

Flexing Ethernet Cable for Linear and Twisting Motion Applications

Application

- For the cabling of industrial Ethernet systems
- Cable design for harsh industrial environments and operating conditions with high noise levels.
- Automation technology, material handling, conveyor technology, and industrial machinery
- Suitable for motion applications with repetitive movement, flexing, and torsional stress
- Compliant with NFPA 79 requirements

Characteristics

- High protection against electromagnetic interference (EMI)
- Oil, abrasion, and sunlight resistant
- Design and approvals for machine and field level
- Flexible for easy installation
- Talc and silicone free

Technical data

Voltage	300V 600V AWM
Test voltage	2000V
Impedance	100Ω ± 10Ω
DC resistance	Max 14Ω/100m
Operating capacitance	< 56pF/m
Temperature range	Moving -25°C to +70°C Fixed -40°C to +80°C
Bending radius min	Moving min. 10 x cable OD Moving optimal 20 x cable OD Fixed min. 7.5 x cable OD
Torsion angle max	+/- 270° / 1m cable length
Oil resistance	Oil Res II
Burning behavior	Flame retardant per UL 1666 (CMR types) UL 1685 (CM types)
Approvals	CMX Outdoor 75C AWM 2463 80C 600V UL 444 -40°C Cold Bend Sun Res RoHS, REACH
Item specific approvals	PLTC CMR 75C CM 75C

Part No.	Description No. of conductors	OD / Ø ca. mm	OD / Ø inches	Weight Lbs/Mft	Copper Lbs/Mft

Construction

- AWG conductor
- Tinned copper wire
- Conductor insulation HDPE
- SF/UTP, foil shield 100%, tinned copper braid shield 75% optical coverage
- Extremely oil resistant TPE Jacket
- Teal jacket similar to RAL 5021

For further information, see Ethernet pages in the Technical Overview

Specifications are subject to change without prior notice

LUTZE SUPERFLEX® ETHERNET (C) PUR, Shielded

High Flexing Ethernet Cable for Continuous Motion Applications

Application

- For the cabling of industrial Ethernet systems
- Cable design for harsh industrial environments and operating conditions with high noise levels
- Applicable in automation technology, transport and conveyor technology, machine tool manufacturing
- For continuous flexing applications in drag chains or free movement
- Compatible with all major drag chain brands
- Compliant with NFPA 79 requirements

Characteristics

- High protection against electromagnetic interference (EMI)
- Talc and silicone free

Technical data

Voltage	300V
Test voltage	1500V
Impedance	100Ω ± 10Ω
Loop resistance	Braid AWG 22/7= 0.34 ² <110Ω/km Braid AWG 24/19= 0.24 ² <155Ω/km Braid AWG 26/19=0.14 ² <280Ω/km
Operating capacitance	50pF/m
Temperature range	Moving -30°C - +70°C Fixed -40°C - +80°C
Bending radius min	Moving 12 x cable OD Fixed 6 x cable OD
Burning behavior	Flame retardant per DIN EN 60332-1-2 IEC 60332-1 UL 1581 FT1
Halogen free	According to DIN EN 60754-1
Approvals	Meets NEC 392, 800 RoHS, REACH
Item specific certifications	CMX 75C AWM 21198 80C 300V CC-Link IE Field (104337)

Construction

- AWG conductor
- Bare copper wire
- Conductor insulation special polyolefin
- Foil shield
- Tinned copper braid, optical coverage 85%
- Oil resistant PUR jacket
- Green jacket similar to RAL 6018

For further information, see Ethernet pages in the Technical Overview

4. Motor Supply, VFD, Servo and Feedback Cables

LUTZE SILFLEX® Tray-ER TPE, Unshielded

Flexible Premium TPE Power Tray Cable for Stationary Applications

Application

- Multi-conductor power cable for tray applications, with exposed run (open wiring) approval
- Compliant with NFPA 79 requirements
- TC-ER for use with cable trays without conduit, which can reduce installation costs in industrial environments
- Metal cutting equipment, machine tools, machine and plant construction, HVAC technology, assembly and production lines, and other industrial applications
- WTTC – wind turbine tray cable rating for use in wind power generation
- Dry, damp and wet locations

Characteristics

- Crush impact resistant
- Gas/vapor-tight sheath per UL 1277
- Cutting oil resistant - mineral & bio/vegetable based oils
**specifically tested with plant based cutting oil*
- Non-wicking fillers
- Sunlight resistant
- Flame retardant
- Talc and silicone free

Technical Data

Voltage	600V 90C TC-ER 600V MTW 1000V 90C WTTC 600V 105C AWM
Temperature range	-40°C - +105°C static
Bending radius min	4 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground
Oil resistance	Oil Res I, Oil Res II
Approvals	UL Type TC-ER UL/CE (UL) Type MTW or DP-1 UL1277 WTTC Meets NEC 336, 392 Class I & II, Div. 2 and Class I Zone 2 per NEC 501, 502, 505 AWM 21270 c(UL) TC, CIC FT4 UL509 BUS Drop RoHS, REACH

Construction

- AWG conductor
- Flexible fine wire stranded bare copper conductors
- PVC/Nylon insulation
- Oil resistant TPE jacket
- Black jacket similar to RAL 9005

“Industrial duty power cable with TC-ER and Bus Drop rating for branch wiring from busways in accordance with NEC article 368.56 (B) ”.

LUTZE DRIVEFLEX® XLPE (C) PVC, Shielded

Flexible VFD Cable XHHW-2 for Stationary Applications

Application

- Dual-shielded motor supply cable to connect power to 3-phase motors, VFDs and servo drives
- Cable design for harsh industrial environments and operating conditions with high noise levels
- Thermoset XLPE insulation offering superior overload and short-circuit temperature
- Type XHHW-2 insulation offering smaller ODs for general VFD applications
- Compliant with NFPA 79 requirements
- TC-ER-JP for use with cable trays without conduit, which can reduce installation costs in industrial environments
- WTTC – wind turbine tray cable rating for use in wind power generation
- Dry, damp or wet conditions

Characteristics

- Flexible XLPE conductor design
- Reduced cable ODs
- High insulation resistance
- Low capacitance cable
- Effective dual layer shield for EMC compliance
- Oil resistant jacket designed for easy stripping
- Non-wicking fillers
- Crush impact resistant
- Gas/vapor-tight sheath per UL 1277
- Sunlight resistant
- Flame retardant
- Direct burial
- Talc and silicone free

Technical Data

Voltage	600V 90C TC-ER-JP 1000V 90C Flexible VFD Servo Cable 1000V 90C WTTC 1000V 105C AWM
Temperature range	-40°C - +105°C static
Bending radius min	6 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground
Oil resistance	Oil Res II
Approvals	UL Type Flexible Motor Supply, Flexible VFD Servo Cable, TC-ER-JP, WTTC, DP-1 Meets NEC 336, 392 Class I & II, Div. 2 and Class I Zone 2 per NEC 501, 502, 505 AWM 20886 Submersible Pump (≥ AWG14) c(UL) TC, CIC FT4 UL 1277 RoHS, REACH

Construction

- AWG conductor
- Flexible fine wire stranded tinned copper conductors for improved electrical characteristics and reduced oxidation
- Thermoset XLPE insulation type XHHW-2, Wet/Dry
- Shielded with foil tape, tinned copper braid with 80% optical coverage, and drain wire
- Oil resistant PVC jacket
- Black jacket similar to RAL 9005

- Effective dual layer shield for EMC compliance
- Oil resistant jacket designed for easy stripping
- Non-wicking fillers
- Crush impact resistant
- Gas/vapor-tight sheath per UL 1277
- Sunlight resistant
- Flame retardant
- Direct burial
- Talc and silicone free

Technical Data

Voltage	600V 90C TC-ER-JP 1000V 90C Flexible VFD Servo Cable 1000V 90C WTTC 1000V 105C AWM
Temperature range	-40°C - +105°C static
Bending radius min	6 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground
Oil resistance	Oil Res II
Approvals	UL Type Flexible Motor Supply Cable, Flexible VFD Servo Cable, TC-ER-JP, WTTC, DP-1 Meets NEC 336, 392 Class I & II, Div. 2 and Class I Zone 2 per NEC 501, 502, 505 AWM 20886 c(UL) TC, CIC FT4 UL 1277 P-07-KA130021-MSHA RoHS, REACH

Construction

- AWG conductor
- Flexible fine wire stranded tinned copper conductors for improved electrical characteristics and reduced oxidation
- Thermoset XLPE insulation, Wet/Dry (4C RHW-2, 2 Pairs XHHW-2)
- Shielded with foil tape, tinned copper braid with 80% optical coverage, and drain wire
- Oil resistant PVC jacket
- Black jacket similar to RAL 9005

WITH TWO SHIELDED CONTROL PAIRS

TSP = Twisted
Shielded Pair

"RHW-2 insulated VFD cable offering optimal capacitance and impedance values. Great for applications with long cable runs".
Meets NFPA 79, article 4.4.2.8.

LUTZE DRIVEFLEX® XLPE (C) Symmetrical, Shielded

Flexible VFD Cable with 3 Symmetrical Grounds for Stationary Applications

Application

- Dual-shielded motor supply cable to connect power to 3-phase motors, VFDs and servo drives
- Three insulated symmetrical ground design helps to reduce stray currents
- Cable design for harsh industrial environments and operating conditions with high noise levels
- Thermoset XLPE insulation offering superior overload and short-circuit temperature
- Type XHHW-2 insulation offering smaller ODs for general VFD applications
- Compliant with NFPA 79 requirements
- TC-ER for use with cable trays without conduit, which can reduce installation costs in industrial environments
- WTTC – wind turbine tray cable rating for use in wind power generation
- Dry, damp or wet conditions

Characteristics

- Flexible XLPE conductors
- Three symmetrical, insulated grounds (PEs)
- High insulation resistance
- Low capacitance cable
- Effective dual layer shield for EMC compliance
- Oil resistant jacket designed for easy stripping
- Non-wicking fillers
- Crush impact resistant
- Gas/vapor-tight sheath per UL 1277
- Sunlight resistant
- Flame retardant
- Direct burial
- Talc and silicone free

Technical Data

Voltage	600V 90C TC-ER 1000V 90C Flexible VFD Servo Cable 1000V 90C WTTC
Temperature range	-40°C - +90°C static
Bending radius min	7.5 x cable OD fixed
Conductor marking	Black with white numbers and three green/yellow ground
Oil resistance	Oil Res II
Approvals	UL Type Flexible Motor Supply Cable, Flexible VFD Servo Cable up to 4/0 Meets NEC 336, 392 Class I & II, Div. 2 and Class I Zone 2 per NEC 501, 502, 505 UL Types WTTC, TC-ER c(UL) TC, CIC FT4, CE UL 1277, UL 2277 P-07-KA130021-MSHA RoHS REACH

Construction

- AWG conductor
- Flexible fine wire stranded tinned copper conductors for improved electrical characteristics and reduced oxidation
- Thermoset XLPE insulation, Wet/Dry XHHW-2 (3C Power + 3C Grounds/PEs)
- Shielded with foil tape, tinned copper braid with 80% optical coverage, and drain wire
- Oil resistant PVC jacket
- Black jacket similar to RAL 9005

WITH THREE SYMMETRICAL GROUNDS (3 Power + 3 Protective Earth Grounds)

LUTZE DRIVEFLEX® CONTROL TSP XLPE (C) PVC, Shielded

Twisted Shielded Pair Cable for Control Signals for Stationary Applications

Application

- Easily add control pairs to any VFD circuit
- Twisted shielded pair cable for VFD & motor applications to transmit control signals from drives to motors
- Separating control from power allows full ampacity rating of the power cable
- Cable design for harsh industrial environments and operating conditions with high noise levels
- Thermoset XLPE insulation offering superior overload and short-circuit temperature
- Compliant with NFPA 79 requirements
- TC-ER for use with cable trays without conduit and alongside power tray cables
- WTTC – wind turbine tray cable rating for use in wind power generation
- Dry, damp or wet conditions

Characteristics

- Flexible XLPE conductor design
- High insulation resistance
- Low capacitance cable
- Effective dual layer shield for EMC compliance
- Oil resistant jacket designed for easy stripping
- Non-wicking fillers
- Crush impact resistant
- Gas/vapor-tight sheath per UL 1277
- Sunlight resistant
- Flame retardant
- Direct burial
- Talc and silicone free

Technical Data

Voltage	600V 90C TC-ER 1000V 90C Flexible VFD Servo Cable 1000V 90C WTTC
Temperature range	-40°C - +90°C static
Bending radius min	6 x cable OD
Conductor marking	Black with white number print
Oil resistance	Oil Res II
Approvals	UL Type Flexible Motor Supply Cable, Flexible VFD Servo Cable UL Type TC-ER, WTTC Meets NEC 336, 392 Class I & II, Div. 2 and Class I Zone 2 per NEC 501, 502, 505 c(UL) TC, CIC FT4 UL 1277 RoHS, REACH

Construction

- AWG conductor
- Flexible fine wire stranded tinned copper conductors for improved electrical characteristics and reduced oxidation
- Thermoset XLPE insulation type XHHW-2, Wet/Dry
- Each pair shielded with foil tape, drain wire, tinned copper braid (≥ 80% optical coverage), then wrapped in clear foil
- Oil resistant PVC jacket
- Black jacket similar to RAL 9005

Specifications are subject to change without prior notice

“1000V rated control pair(s) for installation alongside VFD cable. Separating control pairs from the power conductors eliminates ampacity derating otherwise required for composite power cables per 2020 NEC 310.15(C)(1)”.

LUTZE SILFLEX® M (C) Motor TPE, Shielded

Flexible Motor Cable for Stationary Applications

Application

- Shielded motor supply cable to connect power to 3-phase motors and servo drives
- Cable design for harsh industrial environments and operating conditions with high noise levels
- Improved insulation design with additional conductor stress relief layer as a power distortion suppressant
- Compliant with NFPA 79 requirements
- TC-ER for use with cable trays without conduit, which can reduce installation costs in industrial environments
- For Allen-Bradley® 2090 and other similar servo systems
- Dry, damp and wet locations

Characteristics

- Improved design with conductor stress relief layer helps to prevent premature cable failure and reduces corona effects, increasing reliability and lifetime
- Crush impact resistant
- Gas/vapor tight sheath per UL 1277
- Very round cable with small diameter
- Specially formulated TPE jacket for superior oil resistance
- Resistant to many mineral and vegetable based cutting oils
- Non-wicking fillers
- Sunlight resistant
- Flame retardant
- Talc and silicone free

LUTZE SILFLEX® (C) TPE Feedback, Shielded

Flexible Feedback Cable for Stationary Applications

Application

- Incremental encoder cable and resolver cable for tach sensor, brake sensor, speed sensor
- Cable design for harsh industrial environments and operating conditions with high noise level
- Compliant with NFPA 79 requirements
- For Allen-Bradley® and other Systems
- Dry, damp and wet conditions

Characteristics

- High protection against electromagnetic interference (EMI)
- Flexible for easy installation
- Specially formulated TPE jacket for superior oil resistance according to UL 1581
- Resistant to many mineral & vegetable based cutting oils
- Non-wicking fillers
- Extended temperature range and premium durability
- Sunlight resistant
- Talc and silicone free

LUTZE MOTIONFLEX® M (C) TPE, Shielded

Flexing Motor Cable for Linear and Twisting Motion Applications

Application

- Shielded motor supply cable to connect power to 3-phase motors, VFDs and servo drives
- Suitable for motion applications with repetitive movement, flexing, and torsional stress
- Thermoset XLPE insulation offering superior overload and short-circuit temperature
- Compliant with NFPA 79 for wiring of industrial machinery
- TC-ER for use with cable trays without conduit, which can reduce installation costs in industrial environments
- WTTC – wind turbine tray cable rating for use in wind power generation
- Dry, damp or wet conditions

Characteristics

- Highly flexible XLPE conductor design
- Reduced cable ODs
- High insulation resistance
- Low capacitance cable
- Specially formulated jacket for oil resistance and easy strip
- Crush impact resistant
- Gas/vapor-tight sheath per UL 1277
- Sunlight resistant
- Flame retardant
- Talc and silicone free

LUTZE SUPERFLEX® Plus M PUR 0.6/1kV, Unshielded

High Flexing Motor Cable for Continuous Motion Applications

Application

- Continuous flexing motor and power cable for machine tools, handling equipment and processing machines
- For the most demanding flexing applications such as drag chains and linear flexing
- Compatible with all major drag chain brands
- Compliant with NFPA 79, Article 12.9

Characteristics

- Super finely stranded per Class 6 for continuous moving applications
- TPE conductor insulation
- Low capacitance
- PUR jacket
- Highest level of resistance against cooling fluids, greases and oils
- Ecolab certified resistance to common cleaning agents and chemicals used in food and beverage washdown procedures
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe, and rot resistant
- UV resistant
- Non-wicking fillers
- Talc and silicone free

Technical Data

Voltage	1000V 80C AWM 0.6/1kV U ₀ /U
Temperature range	Moving -25°C - +80°C Fixed -40°C - +80°C
Bending radius min	Moving 7.5 x cable OD Fixed 4 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground
Insulation resistance	Min 500MΩ x km
Burning behavior	Flame retardant per DIN EN 60322-1-2 IEC 60332-1 UL 1581 section VW-1 FT1
Halogen free	According to DIN EN 60754-1
Oil resistance	Oil Res II
Approvals	UL AWM Style 21223 RoHS, REACH

Construction

- Metric conductor
- Bare copper wire super finely stranded per DIN VDE 0295 Class 6 and IEC 60228 Class 6
- Special TPE conductor insulation
- G: with GNYE ground conductor
- Layer pitch optimized
- Fleece wrap over cabled conductor
- Extremely oil resistant PUR jacket
- Black jacket similar to RAL 9005

- Suitable for applications with extremely rough operating conditions and oil exposure
- For the most demanding flexing applications such as drag chains and linear flexing
- With one control pair for SIEMENS (6FX8008) and similar systems
- Compatible with all major drag chain brands
- Compliant with NFPA 79, Article 12.9

Characteristics

- Super finely stranded per class 6 for continuous moving applications
- Reduced friction
- Low capacitance
- Highest level of resistance against cooling fluids, greases and oils
- Ecolab certified resistance to common cleaning agents and chemicals used in food and beverage washdown procedures
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe, and rot resistant
- UV resistant
- Non-wicking fillers
- Talc and silicone free

Technical Data

Voltage	1000V 80C AWM 0.6/1kV U ₀ /U
Temperature range	Moving -25°C - +80°C Fixed -40°C - +80°C
Bending radius min	Moving 10 x cable OD Fixed 6 x cable OD
Conductor marking	Black with white numbers and one green/yellow ground Control pair color-coded (bk, wh)
Insulation resistance	Min. 500MΩ x km
Burning behavior	Flame retardant per DIN EN 60332-1-2 IEC 60332-1 UL 1581 section VW-1 FT1
Halogen free	According to DIN EN 60754-1
Oil resistance	Oil Res II
Approvals	UL AWM Style 21223 RoHS, REACH

Construction

- Metric conductor
- Bare copper wire super finely stranded per DIN VDE 0295 class 6 and IEC 60228 class 6
- Special TPE conductor insulation
- G: with GNYE ground conductor
x: without ground conductor
- Control pair individually shielded with foil and braid
- Tinned copper braid shield, optical coverage 85%
- Extremely oil resistant PUR jacket
- Orange jacket similar to RAL 2003

LUTZE SUPERFLEX® Plus M (C) PUR 0.6/1kV, Shielded

High Flexing Composite Motor Cable for Continuous Motion Applications

Application

- Continuous flexing motor, servo and VFD cable
- Suitable for applications with extremely rough operating conditions and oil exposure
- For the most demanding flexing applications such as drag chains and linear flexing
- With two control pairs for Indramat / Bosch Rexroth and similar systems
- Compatible with all major drag chain brands
- Compliant with NFPA 79, Article 12.9

Characteristics

- Super finely stranded per Class 6 for continuous moving applications
- Reduced friction
- Low capacitance
- Highest level of resistance against cooling fluids, greases and oils
- Ecolab certified resistance to common cleaning agents and chemicals used in food and beverage washdown procedures
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe, and rot resistant
- UV resistant
- Non-wicking fillers
- Talc and silicone free

Technical Data

LUTZE SUPERFLEX® Plus M PUR 0.6/1kV, Unshielded

High Flexing Single Conductor Motor Cable for Continuous Motion Applications

Application

- Continuous flexing cable suitable for machine and device construction for transport and conveyor technology
- As motor supply or ground conductor
- For the most demanding flexing applications such as drag chains and linear flexing
- Compatible with all major drag chain brands
- Compliant with NFPA 79, Article 12.9

Characteristics

- Super finely stranded per class 6 for continuous moving applications
- Very good alternating bending strength
- TPE insulation with very high break through resistance
- PUR jacket for highest level of resistance against cooling fluids, greases and oils
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe, and rot resistant
- UV resistant
- Talc and silicone free

Technical Data

Voltage	1000V 80C AWM 0.6/1kV U ₀ /U
Test voltage	4000V
Temperature range	Moving -25°C - +80°C Fixed -40°C - +80°C
Bending radius min	Moving 7.5 x cable OD Fixed 4 x cable OD
Insulation resistance	Min. 200MΩ x km
Burning behavior	Flame retardant per DIN EN 60332-1-2 IEC 60332-1 UL 1581 section VW-1 FT1
Halogen free	According to DIN EN 60754-1
Oil resistance	Oil Res II
Approvals	UL AWM Style 10587 RoHS, REACH

Construction

- Metric conductor
- Bare copper wire super finely stranded per DIN VDE 0295 class 6 and IEC 60228 class 6
- Special TPE conductor insulation
- Extremely oil resistant PUR jacket
- Black jacket similar to RAL 9005

LUTZE SUPERFLEX® Plus (C) PUR Feedback, Shielded

High Flexing Feedback Cable for Continuous Motion Applications

Application

- Incremental encoder cable, termination cable for tach sensor, brake sensor, speed sensor
- Suitable for applications with extremely rough operating conditions and oil exposure
- For the most demanding flexing applications such as drag chains and linear flexing
- For Bosch-Rexroth and other systems
- Compatible with all major drag chain brands
- Compliant with NFPA 79, Article 12.9

Characteristics

- High resistance to electromagnetic interference (EMI)
- Special braided shield, optimized for continuous flexing
- Very good alternating bending strength
- Abrasion, high wear and tear resistance
- Hydrolysis, microbe, and rot resistant
- UV resistant
- Salt water resistant
- Excellent coolant and lubricant resistance
- Resistant to most oils, greases, alcohol-free benzenes and kerosene
- Talc and silicone free

Technical Data

Voltage	300V 80C AWM
Test voltage	2000V
Insulation resistance	Min. 200MΩ x km
Temperature range	Moving -25°C - +80°C Fixed -40°C - +80°C

LUTZE TOP-T Fittings Metric

Characteristics

- Integrated strain relief
- Wide sealing and clamping range
- Easy to install
- Manufactured acc to EN 62444

Specifications

Connecting thread	Metric EN 60423
Temperature range	
Permanent	-20°C - +100°C / -4°F - +212°F
Intermittent	-30°C - +150°C / -22°F - +302°F
Protection class	IP68 EN 60529
Material	
Body	Polyamide 6
Seal	CR Chloroprene Rubber
Color	Black RAL 9005 Gray RAL 7001

LUTZE TOP-T Fittings EMC Metric and NPT

Metal EMC (Electro Magnetic Compatibility), Quick Installation, Vibration Proof

Characteristics

- Adapts to different size cable shields
- 360° vibration proof shield termination
- Integrated strain relief
- Wide sealing and clamping range
- Updated design for easy installation
- Easy insertion of the cable from either end of the fitting
- Low contact resistance due to large alloy copper contacts
- Manufactured acc to EN 62444

Specifications

Connecting thread	Metric EN 60423 NPT ANSI B1.20.1

LUTZE Cablefix® X

Cablefix® X Cable Entry System

Characteristics

- Cables install easily by pushing the end through the seal from the front
- Strain relief in one direction
- Saves over 50% installation space and 80% installation time vs. using individual cable glands
- Easy to install: can be bolt mounted or snapped directly into enclosures with a 1.5mm wall thickness
- Integrated seals offer excellent ingress protection
- Entry points are sealed by default, eliminating the need for blanking plugs
- Standard cutout makes cabinet preparation easy and is compatible with common punches
- Mounting hardware included with all frames

Specifications

Frame material	Polyamide (PA) with glass fiber reinforcement
Seal material	Butyl (IIR) rubber
Spacer	Chloroprene
Inner membrane	Polyurethane
Temperature range	-40°C to +80°C -40°F to +176°F
Burning behavior	HB according to UL 94
Silicone free	Yes
Protection class	UL Type 4X* UL Type 12 UL Type 13 IP65
Gasket	Polyurethane
Frame color	Black RAL 9005

*Note: UL Type 4x applies to cables with a diameter of 5.0mm and larger.

LUTZE Cablefix® One Kits

Cablefix® One Modular Cable Entry System

Characteristics

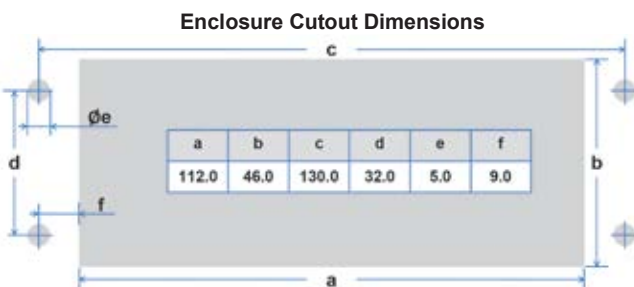

- Suitable for cables with or without pre-installed connectors
- Kits include frame, hardware, and the layered seals needed to cover entire clamping range specified for each entry point (2 seals per entry point)
- Kits simplify the specifying and ordering process by eliminating the need to order individual seals and frame components
- Easy to install, bolt mounted to a 112 x 46mm cutout
- Individual cables can be easily removed and replaced for troubleshooting, maintenance or retrofitting
- Modular multilayer seals accommodate a wide range of cable diameters
- Strong integrated strain relief
- Unused seals are closed by default, eliminating the need for blanking plugs
- Fiberglass reinforced frame withstands harsh industrial environments
- Standard cutout makes cabinet preparation easy and is compatible with common punches
- Mounting hardware included with all frames

Specifications

Frame material	Polyamide (PA) with glass fiber reinforcement
Seal material	Chloroprene rubber (CR)
Temperature range	-40°C to +80°C -40°F to +176°F
Burning behavior	HB according to UL 94
Silicone free	Yes
Protection class	UL Type 4X UL Type 12 UL Type 13 IP66
Strain relief	Per EN 62444
Gasket	Polyurethane
Frame color	Black RAL 9005

Assembly of Modular Strain Relief System

1. Choose aluminum or plastic frame.

The Cablefix® Vario features outstanding material characteristics for harsh industrial environments and a high sealing protection of IP65. Every frame ships with an included drill pattern for proper mounting to the cabinet. The plastic frames are made of reinforced polyamide 66 with brass support. The aluminum version is made entirely of solid polished aluminum. Cablefix® Vario offers strain relief options for cable ranges from 4.5 to 34.5mm in diameter. The versatile system is ideal for installations and retrofitting, and offers proper strain relief for already connectorized cables. This is a great advantage over conventional solutions with standard cable fittings.

2. Choose appropriate inserts for the selected frame.

Example:

606052 can hold either

- 4 inserts type VK or
- 2 inserts type VG
- 2 VK inserts replace 1 VG insert

VK small	VK small	VG large	VG large	VG large	VK small
VK small	VK small				VK small

- The tongue and groove design makes combining different inserts quick and easy.
- The slotted design allows easy installation by sliding the assembled cables in from the side.

3. Select appropriately sized blanking plugs for unused holes.

Once all unused holes are plugged, the system provides a protection rating IP65. The rubber components do not require the use of grease, which is advantageous over other similar systems.

The advantages at a glance:

- Minimum space requirement
- Simple insertion of rubber inserts due to tongue and groove design
- Very versatile
- Allows future expansion
- Ideal for retrofitting of existing cabinets

Specifications are subject to change without prior notice

Light Duty Modular Cable Entry System Cablefix®

Characteristics

- Cables push easily into position, locks itself and it can no longer be pulled out unless the clamp is released
- Strain relief in one direction
- Integrated seal for ingress protection
- Individual cables can be easily loosened and replaced for troubleshooting, maintenance or retrofitting
- Mix & Match: interlocking seal allows for any combination of the three different Cablefix® versions to custom fit it to your application
- Blanking plugs included to seal unused holes

Specifications

Material	Polyamide PA
Temperature range	-30°C - +70°C / 22°F - +212°F
Halogen free	Yes
Burning behavior	Polyamide plate according to UL 94 V2
Silicone free	Yes
Enclosure wall thickness	maximum 3 mm
Protection class	IP55 EN 60529
Seal	NBR60 oil resistant

LUTZE Network Connectivity

Field Wireable M12 Connectors with Push-In Technology

Application

- Actuator sensor connections
- Plant floor connectivity
- I/O connections

Characteristics

- Spring clamp push-in termination
- Solid conductors and ferrules can be terminated by simply pushing into the connector, with no tools required
- Stranded conductors are easily terminated by opening the color-coded tabs and inserting the wire
- Straight or 90° angled design
- Zinc die-cast and plastic housing
- Fast and easy connection
- Suitable for unshielded cables

Technical Data

Temperature range	-40°C - +85°C/ -40°F - +185°F
Protection class	IP65, IP67 inserted and tightened
Rated current	4A
Contact material	CuSn, gold-plated
Conductor OD	AWG26-AWG18 with ferrule: AWG28-AWG20
Cable OD	4 - 8 mm
Approvals	cULus

Male Pinouts

Female Pinouts

Stranded conductors are easily terminated without tools by opening the tabs and inserting the wire:

LUTZE Network Connectivity

Field Wireable M12 Connectors with Push-In Technology

Application

- Actuator sensor connections
- Field bus connections
- Industrial Ethernet connections
- Plant floor networking
- I/O connections

Characteristics

- Spring clamp push-in termination
- Solid conductors and ferrules can be terminated by simply pushing into the connector, with no tools required
- Stranded conductors are easily terminated by opening the color-coded tabs and inserting the wire
- Straight or 90° angled design
- Zinc die-cast housing
- Fast and easy connection
- Suitable for unshielded cables

Technical Data

Temperature range	-40°C - +85°C/ -40°F - +185°F
Protection class	IP65, IP67 inserted and tightened
Rated current	4A
Shielding	360°
Contact material	CuSn, gold-plated
Conductor OD	AWG26-AWG18 with ferrule: AWG28-AWG20
Cable OD	4 - 8 mm
Approvals	cULus
Item specific applications	B-coded: PROFIBUS D-coded: PROFINET Cat5e

Male Pinouts

A-cod.

Female Pinouts

LUTZE SILFLEX®

LUTZE SILFLEX® - The Flexible Cable for Harsh Industrial Environments

LUTZE SILFLEX® cables are suitable for stationary and flexible applications without continuous linear movement (not recommended for drag chains) and allow easy installation in the field.

LUTZE SILFLEX® cables are available in control and power cable configurations.

LUTZE SILFLEX® cables are flexible for easy routing to the machine and are designed to withstand the exposure to various harsh industrial environments.

LUTZE SILFLEX® cables can be used in machine tools, machine and plant construction, industrial HVAC technology, assembly and production lines as well as many other industrial applications.

LUTZE SILFLEX® cables are silicone free and are approved by many automotive manufacturing plants.

LUTZE MOTIONFLEX® – One Cable for Many Applications

LUTZE MOTIONFLEX® cables are suitable for moderate drag chain applications as well as motion applications with repetitive movement, flexing and torsional stress.

LUTZE MOTIONFLEX® cables can be used in automation technology, material handling, conveyer technology, and industrial machinery.

LUTZE MOTIONFLEX® cables provide a high quality TPE jacket for resistance to many physical and chemical environmental hazards.

LUTZE MOTIONFLEX® cables carry multiple approvals for use in facility wiring, cable tray, on-machine, and in-cabinet. In addition, they are UL listed for machine and field wiring.

LUTZE SUPERFLEX® sets Industry Standards: Longevity, Reliability, Flexibility

LUTZE offers a variety of high flexing cables specifically designed for use in continuous motion applications such as drag chains.

LUTZE SUPERFLEX® and LUTZE SUPERFLEX® Plus cables include high flexing control and motor supply cables, as well as electronic and network cables. LUTZE SUPERFLEX® cables are compatible with all major drag chain brands.

LUTZE SUPERFLEX® PVC is designed for moderate to higher performance flexing in short to medium length drag chains. LUTZE SUPERFLEX® PVC is offered with PVC or High Glide TPE insulation and with specially formulated PVC jacket.

LUTZE SUPERFLEX® Plus PUR is designed for high performance flexing or longer drag chains. LUTZE SUPERFLEX® Plus PUR cables are manufactured with premium materials such as High Glide TPE insulation and PUR jackets for high performance applications in modern high speed machine tools.

All high flexing cables require special handling and installation techniques which are different from those of standard flexible control cables. To ensure the longest possible life span for your cable, it is important to follow installation procedures precisely.

Handling & Installation LUTZE SUPERFLEX® – Quick Overview

1. Selecting Cables for Continuous Motion Applications in Drag Chains

We recommend special high flexing cables such as LUTZE SUPERFLEX® cables, for use in C-tracks to ensure long life times:

- LUTZE SUPERFLEX® cable is proven to be compatible with all major brands of drag chains.
- LUTZE SUPERFLEX® PVC is designed for moderate flexing in short to medium length drag chains.
- LUTZE SUPERFLEX® Plus PUR is designed for high performance flexing or longer drag chains.

High Flexing Cables such as LUTZE SUPERFLEX® cables are different from standard flexible cables:

Standard Flexible Cables – LUTZE SILFLEX®

- Low number of strands per conductor
- longer pitch layering
- designed as a pliable cable for easy routing and installation

- no central core
- mostly PVC as insulation material
- foil shield or braid shield
- jacket material depends on application

High Flexing Cables – LUTZE SUPERFLEX®

- high number of super fine strands per conductor
- short pitch layering
- conductors are cabled without back twist
- higher quality of materials
- slower and more complex manufacturing process on high-end equipment
- designed for linear constant motion

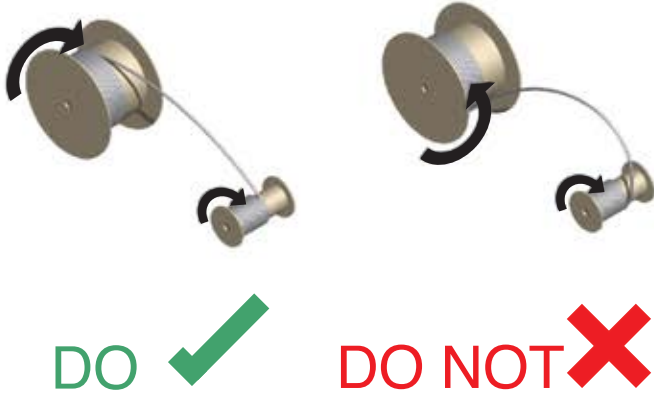

- central core for single layer construction
- special PVC or TPE as insulation material
- tinned copper braid shield
- high abrasion resistant jacket material such as PUR

Handling & Installation LUTZE SUPERFLEX® – Quick Overview

2. Correct Handling of LUTZE SUPERFLEX® Cables

- When unreeling the cable, do not change the bend direction. The cable has to go on the new reel in the same direction it came off the reel. Low and equal tensile force during spooling!

- Ring put ups require careful uncoiling by rolling the ring upright over the floor.
- Do not twist the cable when unwinding. Always unwind straight from spool.

3. Correct Installation of LUTZE SUPERFLEX® Cables

- Cable retains bend from reel. Do not flex against original bend or relax cable for 24 hrs by laying it flat.

- Try to ensure balanced weight distribution. If you have more than one heavy cable, we recommend installing the heavy cables evenly to each side of the drag chain.

- Use dividers horizontally and vertically to separate the drag chain into separate cavities. Install just one cable per separated cavity. If absolutely necessary, two small or a small and a big cable can share a cavity.

- Observe the minimum bending radius for optimum performance. Make sure that all cables are length-adjusted and run in the neutral zone.

LUTZE Technical Overview

LUTZE SUPERFLEX® High Flexing Cable Cycle Ratings

The demanding mechanical requirements in drag chains require the use of specially designed cables, constructed for continuous flexing. The lifetime of cables in drag chains highly depends on the mechanical parameters of the application, but also on proper handling and installation of the cable.

Cable Type	Traveling distances	Bending Radius	Speed	Acceleration	Cycles
LUTZE SUPERFLEX® PLUS PUR					

Unshielded cables with special TPE or High Glide Insulation, PUR or TPE jackets	< 16 ft / 5 m	> 10 Ø	< 3 m/s	< 5 m/s ²	20,000,000
	< 67 ft / 20 m	> 7 Ø	< 5 m/s	< 10 m/s ²	10,000,000
	< 328 ft / 100 m	> 7 Ø	< 5 m/s	< 10 m/s ²	2,000,000

LUTZE SUPERFLEX® PLUS (C) PUR					
--------------------------------------	--	--	--	--	--

Shielded cables with special TPE or High Glide Insulation, special sub-jackets, and PUR or TPE jackets	< 16 ft / 5 m	> 12 Ø	< 3 m/s	< 5 m/s ²	20,000,000
	< 67 ft / 20 m	> 10 Ø	< 5 m/s	< 10 m/s ²	10,000,000
	< 328 ft / 100 m	> 10 Ø	< 5 m/s	< 10 m/s ²	2,000,000

LUTZE SUPERFLEX® PVC					
-----------------------------	--	--	--	--	--

Unshielded cables with special TPE or High Glide Insulation, PVC and Alloy jackets e.g. A148 series	< 16 ft / 5 m	> 12 Ø	< 3 m/s	< 5 m/s ²	10,000,000
	< 49 ft / 15 m	> 10 Ø	< 5 m/s	< 10 m/s ²	5,000,000

LUTZE SUPERFLEX® PVC (C)					
---------------------------------	--	--	--	--	--

Shielded cables with special TPE or High Glide Insulation, fleece wrap or sub-jackets PVC and Alloy jackets e.g. A149 series	< 16 ft / 5 m	> 15 Ø	< 3 m/s	< 5 m/s ²	10,000,000
	< 49 ft / 15 m	> 12 Ø	< 5 m/s	< 10 m/s ²	5,000,000

The data in this table shows actual application parameters and accomplished cycles in independent tests. Flexing cycle performance can only be compared by looking at all the data. A rating of "millions of operations" is meaningless if the distance, speed and bend radius is unknown.

BUS and Network Cables

BUS and Network cables

BUS-Systems have become a very vital part of factory automation and it is hard to imagine automation without them. Besides hardware and software components, passive components such as bus cables and connectors play an important role for reliable function of the system. Bus cables must comply with all electrical parameters of the particular system. There is no universally applicable bus cable as the individual requirements are too diverse. LUTZE offers robust, industrial grade fieldbus and network cables for the most commonly used systems worldwide. These cables are being offered for stationary and flexible applications as well as continuous moving applications in drag chains.

Systems:

Profibus

Profibus is the most common Bus System used in Europe in the area of automated manufacturing.

Profibus DP

This Profibus variant, optimized through increased transmission speed and low installation cost, was especially designed for the communication between automation systems and decentralized peripheral devices in the field range. Profibus DP substitutes the conventional parallel data communication with 24V or 0-20 mA. LUTZE Profibus cables meet the specification for Profibus DP type A according to EN 50254. Profibus DP and Profibus FMS use the same transmission technology as well as a unified BUS protocol. Both variants can be operated simultaneously on one cable.

Profibus Fast Connect®

These cables have an optimized radial, symmetrical construction and can facilitate the application of special tools. Thereby, bus connector plugs are able to be assembled in a fast and installation-friendly way.

CAN-Bus

CAN-Bus is specified according to ISO 11898. Primarily designed for automotive applications CAN-Buses are used today for the exchange of digital information, Controller Area Network (CAN) for faster data transfer/data exchange.

DeviceNet™

DeviceNet™ is a service related network, based on the proven CAN-Technology for fast data exchange. The configuration consists of thick cable (aka Trunk cable) and thin cable (aka drop cable). The use of high flexing cables in drag chains is likewise possible. DeviceNet™ has been standardized by Open DeviceNet™ Vendor Association (ODVA) and is the leading bus system for industrial automation in North America.

Industrial Ethernet

Ethernet is the most commonly used communication technology. The Ethernet Standard allows for a remarkable increase in the bandwidth, from 12 Mbits/s for a bus system, to up to 10Gbit/s. In the office world the Ethernet standard has already established itself as the standard technology, however the requirements for wiring systems and active components in the industrial environment differ greatly from those in an office environment. On one hand the infrastructure must be more robust; and on the other hand, criteria such as real time application require special IT solutions. Consequently, this has resulted in the development of various proprietary systems such as PROFINET, EtherCAT, Modbus TCP and Powerlink with system specific components which may not be compatible with others. A structured Ethernet cabling according to EN 50173-3 should support each proprietary system. LUTZE offers Industrial Ethernet solutions in light duty, standard duty and continuous flexing versions. Many options include UL 600V AWM and UL Type PLTC approvals for easy deployment in industrial applications.

ETHERNET – Overview

LUTZE Ethernet Cables

We recommend shielded industrial Ethernet cable for use in industrial environment to ensure secure connectivity. Motors and other electrical noise producing devices are often located in close proximity to network cabling. EMI (Electro Magnetic Interference) and RFI (Radio Frequency Interference) can distort data transmission on copper-based network cable. To lessen or eliminate interference, called alien-crosstalk, the use of shielded industrial cable and connectors is recommended.

Ethernet cable types available from LUTZE:

Correct Handling and Installation of Network Copper Cable

- Do not subject cable to tension
- Do not kink the cable
- Do not bend the cable more than 90° (See individual specifications for bending radius)
- Strip the cable as short as possible
- Do not crush cable when fastening
- Do not untwist the conductor pairs by more than 0.5 inch
- Terminate the shielding according to ANSI/TIA/EI 568-B, K.6.2.3 or manufacturer's instructions

Key for Twisted Pair Cables according to ISO/IEC-11801 (2002)E

XX/YYZ

XX for the outer shielding / **Y** for the pair shielding / **ZZ** for the pair arrangement

U = unshielded / **U** = unshielded / **TP** = twisted pair (regular)
F = foiled shield / **F** = foiled shield / **TQ** = quad pair (star quad)
S = braided shield / **S** = braided shield
SF = braided and foiled shield

For shielded cables to be effective against EMI/RFI, the shield should be properly terminated at both ends and continuous for the complete channel (ANSI/TIA/EI 568-B, K.6.2.3).

PROFINET SF/UTQ (Star Quad Design) and Termination

The star quad is a low-impedance Ethernet cable configuration that does not use twisted pairs. This design is commonly used in PROFINET and EtherCAT networks. Four conductors are twisted on a common axis, and the conductors across from each other make a pair.

In **Figure 1** the pairs are as follows:

- Pair 1:**
 Conductor A ←→ Conductor D
- Pair 2:**
 Conductor B ←→ Conductor C

Figure 1

Other terminations than in Figure 1 can lead to interference, decreased connectivity or no connectivity at all.

ETHERNET – Overview

Pin Assignment and Installation

RJ45 is the most common Ethernet connector and is available in both shielded and unshielded designs.

All eight pins of the RJ45 connector are used for 1000 Mbit/s (4-pair transmission). Four pins are used for 10/100 Mbit/s (2-pair transmission).

According to the EN 50173 standard, two color codes are defined for installation: T568A and T568B. It makes no difference which color code is used, however the same code should be used consistently throughout the entire installation. Mixing up the two color codes can result in malfunctions.

Pin assignment RJ45 - Color code according to EN 50173 – hard wiring:

ETHERNET cables									
Star Quad			Regular Twisted Pair						
PIN#	100BASE-TX	Color code	10BASE-T, 100BASE-TX	1000BASE-T		Color code T568A		Color code T568B

M12 Connectors – Overview

M12 connectors are ruggedized circular connectors with a 12-mm locking thread for secure terminations in factory automation. These style connectors can be used in a variety of automation applications such as for actuators, sensors, Fieldbus, and industrial ethernet protocols. There are many different versions of M12s that designed and optimized for specific applications. It is important when specifying an M12 connector to choose the correct pin count and connector coding. This ensures a proper and secure connection between the connector and its terminal.

Common M12 Codes and Applications

A-coded	Actuator-sensor plug connections for systems such as DeviceNet, IO Link, and Profibus
B-coded	Fieldbus connections for systems such as Profibus and Interbus
D-coded	Industrial Ethernet up to 100 Mbit for systems such as Profinet, Ethernet/IP, and EtherCat
X-coded	Cat6A Industrial Ethernet for high-speed 10 Gbit networks

LUTZE Technical Overview

LUTZE DRIVEFLEX® VFD and Servo Motor Cables

A Variable Frequency Drive (VFD) is a device designed for alteration of a motor's rotational speed by changing the frequency and the voltage of the electrical power supplied to it. In this manner, the rotational speed can be adjusted within a wide range from standstill to above the nominal rotation speed at 60 hertz.

The second main feature of a VFD is that it offers motor torque control. To avoid overload of the motor, the torque has to decrease when running the motor at higher speeds and vice versa. In VFD applications the constant frequency of 60 hertz in a sinusoidal waveform is altered into a variable frequency as shown in the illustration.

The use of VFD technology poses high demands on the cable connecting the motor to the drive. Standard 600V control cable does not meet the requirements of VFD applications, thus causing operating malfunctions and may result in premature cable failure. High switching frequencies and harmonic waves cause high capacitive charging current and overvoltage spikes well beyond the 600V rating of standard control cables. These problems put tremendous stress on cables and the stress even increases further the longer the distance between drive and motor.

Another stress factor is called "corona discharge effect". Insulated conductors have very small gaps between the copper strands and the insulation material caused by the irregular surface of stranded conductors. This can lead to an uncontrolled corona discharge across these gaps and break down the insulation over time. This problem is well known in medium voltage applications. Therefore, thermoset XLPE insulation is frequently used in medium voltage applications due to its inherent resistance to corona discharge.

Our internal and external tests have proven that PVC/Nylon insulation commonly used in power tray cables is prone to failure due to corona discharge in 480V VFD applications. With each corona discharge (or partial discharge) the thermoplastic PVC/Nylon insulation is stressed, and pitting occurs. Once the pitting has reached a certain threshold, the microarc will develop into a full short circuit and the cable will be destroyed. This process will occur quicker if the cable lead length from drive to motor is long and moisture is present. Cable failure due to corona discharge is very dangerous, as the operator will typically receive no warning other than nuisance trips, if any at all, before a catastrophic cable failure occurs.

LUTZE offers a premium solution to address the different requirements for VFD and motor cable:

LUTZE DRIVEFLEX® VFD and Servo Cable A premium solution with thermoset XLPE insulation

XLPE is an insulation material with very low capacitance offering superior electrical characteristics for use as a VFD cable, especially in long cable runs. The XLPE insulation is a thermoset material with a very high voltage breakdown level, thus inherently addressing the corona discharge effect and making it the premium insulation for any type of drive application. XLPE insulation is recommended by most drive manufacturers, and LUTZE DRIVEFLEX® exceeds the VFD cable requirements by Rockwell* as stated in the "Wiring and Grounding Guidelines for Pulse Width Modulated (PWM) AC Drives" document. The extra thick insulation offers a nominal voltage rating of 1000V 90°C per UL Flexible VFD & Servo cable specifications. The insulation is designed to withstand even higher voltage spikes and power distortions that can commonly occur in VFD applications. A foil and braid shield combination with drain wire ensures compliance with EMC requirements. LUTZE DRIVEFLEX® XLPE is the most flexible XLPE cable in its class - offering easy stripping & installation, thus saving time and money.

DRIVEFLEX® has also been evaluated as flexible VFD and Servo cable and is UL listed for use on drives and servos, as well as tray cable exposed run (TC-ER). The DRIVEFLEX® cable family includes many different configurations compatible with many standard drive and servo systems.

For more information, please visit www.driveflex.com.

Motor, VFD and Servo Applications

LUTZE offers a wide range of cables especially designed for motor supply applications

Unshielded Motor Supply Cable

For any standard motor supply application without the use of VFD's, and where shielding is not required, we recommend the use of **LUTZE SILFLEX® Tray-ER TPE, unshielded** cables with PVC/Nylon insulation. These cables are available in sizes up to 4/0 and offer superior flexibility paired with ruggedness due to the premium TPE jacket. These power tray cables offer the ability to be installed within and outside the cable tray due to the TC-ER and MTW ratings in accordance with NEC article 336.

Flexible Motor Supply and Variable Frequency Drives (VFD, VSD)

For any motor supply application involving an AC Variable Frequency Drive, we recommend **LUTZE DRIVEFLEX®** cables with **XLPE** insulation. These cables have very low capacitance, high impedance and high voltage breakthrough resistance. XLPE insulation is the superior choice for VFD applications with pulse width modulation (PWM) to cope with high voltage spikes and power distortions from the VFD output. These cables are UL multi-listed type Flexible Motor Supply / Flexible VFD Servo Cable and type TC-ER Power Tray cables.

LUTZE DRIVEFLEX® XLPE (C) PVC, Shielded A106 with XLPE Insulation Type XHHW-2

Small diameter flexible VFD & Motor Supply Cable with 4 conductors including one full size ground. Suitable for all generic drive applications with classic three phase wiring and for any direct, reversing or soft starter application.

LUTZE DRIVEFLEX® XLPE (C) 1 TSP PVC, Shielded A107 with XLPE Insulation Type XHHW-2

Small diameter flexible VFD & Motor Supply Cable with 4 conductors including one full size ground, plus one twisted shielded pair for feedback. Suitable for servo systems such as Rockwell*, Siemens* etc., which require one control pair.

LUTZE DRIVEFLEX® XLPE (C) PVC, Shielded A216 with XLPE Insulation Type RHW-2/XHHW-2

Flexible VFD & Motor Supply Cable with 4 conductors including one full size ground. Low capacitance design allowing for longer cable runs. Suitable for all generic drive applications with classic three phase wiring.

LUTZE DRIVEFLEX® XLPE (C) 1 TSP PVC, Shielded A217 with Insulation Type RHW-2/XHHW-2

Flexible VFD & Motor Supply Cable with 4 conductors including one full size ground, plus one twisted shielded pair for feedback. Low capacitance design allowing for longer cable runs. Suitable for servo systems such as Rockwell*, Siemens* etc., which require one control pair.

LUTZE DRIVEFLEX® XLPE (C) 2 TSP PVC, Shielded A218 with Insulation Type RHW-2/XHHW-2

Flexible VFD & Motor Supply Cable with 4 conductors including one full size ground, plus two twisted shielded pairs for feedback. Suitable for servo systems such as Rockwell*, Indramat* etc., which require two control pairs.

LUTZE DRIVEFLEX® XLPE (C) Symmetrical Grounds PVC, Shielded A220 with Insulation Type XHHW-2

Flexible VFD & Motor Supply Cable with 3 symmetrical grounds. The symmetry in the conductor design reduces motor frame voltage induced by high motor current. Symmetrical ground cable is recommended by ABB* and Rockwell* for larger horsepower motors.

Flexing Cable for Servo Systems and Motion Control

For any continuous moving applications utilizing servo drives, we recommend our special low capacitance cables with TPE or LUTZE High Glide Insulation (HGI) based on polypropylene, including **LUTZE SUPERFLEX® PLUS M (C) PUR UL SERVO 0,6/1 kV** for high flexing applications in drag chains and **LUTZE MOTIONFLEX® M** cables for motor applications with moderate linear flexing, torsion, and free-flexing movement.

*registered trademarks not associated with LUTZE

Approvals

UL Ratings for Cables

Product approvals in the USA are typically conducted by National Recognized Testing Laboratories (NRTL). The NRTLs are determined by the Occupational Safety and Health Administration (OSHA). You can find a list of the current NRTLs on www.osha.gov. LUTZE primarily uses Underwriters Laboratories (UL) to certify products. UL (USA) and CSA (Canada) have an agreement that allows the usage of one approval for both USA and Canada.

There are two main certification classes available for cables:

Certification	Logo	Meaning
UL Recognized		“UL Recognized“ signifies that the product is rated as a component. A component is a part of an application. Cables with an “Appliance Wiring Material“ (AWM per Standard 758) are always “recognized“. Typically these cables are already installed on the machine when it ships.
UL Listed		“UL Listed“ signifies a cable as actually tested and proven for a specific use. This way the cable has to match the UL Standards and the requirements of the National Electric Code (NEC). Typically, cables with a UL Listing are used for field wiring in North America.

UL Listing type	Description	Meaning
CM	Communication	Cables for data communication per UL category DUZX and NEC 800
CMG	Communication General	Cables for data communication per UL category DUZX and NEC 800
CMX	Communication Residential	Cables for data communication with restrictions per UL category DUZX and NEC 800
CMX Outdoor	Communication Residential	Type CMX cable may be marked "Outdoor" to indicate its suitability for installation outdoors on dwellings
CMR	Communication Riser	Cables for data communication in vertical shafts per UL category DUZX and NEC 800
PLTC	Power Limited Tray Cable	Cables for tray applications per UL category QPTZ and NEC 725
PLTC-ER	Power Limited Tray Cable	Exposed Run Cables for tray applications per UL category QPTZ and NEC 725 (exposed use possible)
ITC	Instrumentation Tray Cable	Instrumentation cables for tray applications per UL category NYTT and NEC 727
ITC-ER	Instrumentation Tray Cable Exposed Run	Instrumentation cables for tray applications per UL category NYTT and NEC 727 (exposed use possible)
TC	Power and Control Tray Cable	Power and control cables for tray applications per UL category QPOR and NEC 336
TC-ER	Power and Control Tray Cable, Exposed Run	Power and control cables for tray applications per UL category QPOR and NEC 336 (exposed use possible)
TC-ER-JP	Power and Control Tray Cable, Exposed Run, Joist Pull	TC-ER cable that is suitable for pulling through structural members is marked “JP” per NEC article 336.10(10)
Bus Drop	Bus Drop Cable	Bus drop cable to create branches from busways per NEC 368.56 (B)
MTW	Machine Tool Wire	Single or multi conductor control cables for Machine Tool Wiring per UL category ZKHZ and NEC 670
Flexible Motor Supply	Flexible Motor Supply Cable	Power cables for motor and variable frequency drive applications per UL category ZJFH
Flexible VFD and Servo	Flexible VFD and Servo Cable	Power cables for motor and variable frequency drive applications per UL category ZJFH
WTTC	Wind Turbine Tray Cable	Power and control cables for wind turbine applications per UL category ZGZN

This list only shows the common UL Listings for typical applications in the field of automation and does not represent a complete overview of the available UL Listings.

It is possible to combine different UL Listings in one cable. LUTZE offers a variety of cables with UL Listings for various industrial applications.

LUTZE Technical Overview

NFPA 79 Requirements for Appliance Wiring Material

NFPA 79 is the Electrical Standard for Industrial Machinery in the USA. The NFPA 79 is a standard published by the National Fire Protection Agency, the same agency that publishes the National Electric Code (a.k.a. NEC or NFPA 70).

NFPA 79 Chapter 12 “Conductors, Cables and Flexible Cord” and Chapter 13 “Wiring Practices” address the majority of cable related topics.

A common concern in automation applications is the use of Appliance Wiring Material (AWM) per UL Subject 758 versus UL Listed cables such as UL Type TC-ER or many other listed types.

The NFPA 79 has special provisions addressing safe wiring practices for industrial machinery, such as machine tools, described in article 12.9. This text was introduced with the 2012 edition, allowing the use of appliance wiring material (AWM) to be used with industrial machinery but is limited with special provisions. The use of such cable had been prohibited under the 2007 edition, and this restriction had caused a lot hardship for many machine manufacturers using AWM. This has been resolved since 2012 with the introduction of article 12.9 Special Cables and Conductors.

NFPA 79 still mainly makes references to “Listed” cable. These cables carry a National Recognized Testing Laboratory (NRTL) listed logo such as the “UL Listed” logo. It should be noted that cables can have dual or multi ratings and carry both marks UL Recognized and UL Listed along with other marks.

Permitted for all applications:   

Appliance Wiring Material is regulated by UL 758 and carries the UL Recognized logo.

Since 2012 permitted for special applications:  

In order to use Appliance Wiring Material on industrial machinery and be compliant with NFPA 79, the cable must accommodate the provisions stated in article 12.9 “Special Cables and Conductors” of the NFPA 79 standard.

It is sufficient to comply with one of the three conditions in section 12.9.2 instead of having to meet their requirements in combination. For example:

1. It is permissible to use AWM cable or conductors if part of a listed assembly identified for the intended use.
2. Or it is permissible to use AWM cable or conductors where the AWM has been identified for use with approved equipment and is used in accordance with the equipment manufacturer’s instructions.
One example would be a servo drive system with a cable assembly made per the servo drive system manufacturer’s specification and installed per the manufacturer’s instructions.
3. Or it is permissible to use AWM cable or conductors where its construction meets all applicable requirements of Section 12.2 through Section 12.6 with some modifications. These modifications set requirements in terms of construction, flame resistance, insulation and voltage ratings as well as marking and print legends for clear identification. This will allow those types of AWM cables which are suitable for industrial use by their nature. However, it will control the misuse of AWM cables which do not meet industrial application requirements, e.g. voltage rating, insulation thickness, oil resistance, etc.

All LUTZE AWM cables are designed for use in industrial environments and the AWM style and voltage rating is clearly marked on each cable jacket, therefore all LUTZE AWM cables can be used in applications governed by the NFPA 79 standard. For field installation it will still be safest to rely on cable that is UL Listed and verified for the intended use as required by the NEC (NFPA 70). UL Listed cable will make it easier to evaluate a machine in the field and will therefore remain a prominent choice for most machine builders in the USA. UL Listed cable will also eliminate the need for documentation that the use of AWM cable may require.

Please contact your LUTZE representative with questions regarding our offering of UL Listed and UL Recognized cables to help you be compliant with the latest standards for industrial machinery.

LUTZE offers many listed types, including MTW, TC-ER, PLTC and CM marks. Cables with these markings are considered listed types and are always permitted to be used in NFPA 79 compliant applications, as well as in applications per NEC.

NFPA 79 Requirements for VFD Cables

NFPA 79 Chapter 4 “General Requirements and Operating Conditions” describes the general requirements and conditions for the operation of the electrical equipment of the machine.

The relevant section regarding VFD cable can be found in article 4.4.2.8 “Circuits Supplied from Power Conversion Equipment” which addresses the proper selection of insulation materials and/or cables to be used with power conversion equipment such as VFDs and servo drives. VFDs and servos utilizing Pulse Width Modulation (PWM) technology typically create power distortions leading to harmonics, voltage spikes and overcurrent issues. This section aims to bring awareness to a potential safety concern regarding the use of thermoplastic wiring such as PVC or PVC/Nylon commonly used in power and control tray cables which are not designed as VFD or motor supply cables under such conditions.

NFPA 79 article 4.4.2.8 “Circuits Supplied from Power Conversion Equipment” describes two options to safely operate a VFD which is crucial for drives operating at 480V or higher as the resulting output waveform is exhibiting a different behavior and power distortions that can stress PVC/Nylon insulation to catastrophic failure.

A safety concern may exist when thermoplastic wiring materials are being used. Most thermoplastic insulation types have difficulty to withstand the output voltages and currents from a VFD utilizing pulse width modulation over time. Thermoplastic insulation, such as PVC/Nylon which commonly used in power tray cables, can create problems, for example, in moist environments or in longer cable runs between VFD and motor. The dielectric properties of PVC cause high cable capacitance leading to high charging currents; the low voltage breakthrough resistance can lead to corona discharge and the potential for shorting out the cable. Additionally, thermoplastic PVC can melt and be deformed when exposed to excessive heat generated by short circuits or overloads.

Insulation types “RHH, RHW, RHW-2, XHH, XHHW, or XHHW-2” all are thermoset Insulation types per UL 44 which have strong dielectric properties and will not melt. These are common designations translating as follows:

XLPE	Cross Linked Polyethylene is a thermoset insulation material
RHH	Rubber High Heat resistant
RHW	Rubber Heat and Water resistant
RHW-2	Rubber Heat and Water resistant 90°C dry and 90°C wet locations
XHH	Crosslinked (Polyethylene) High Heat resistant
XHHW	Crosslinked (Polyethylene) High Heat and Water resistant
XHHW-2	Crosslinked (Polyethylene) High Heat and Water resistant 90°C dry and 90°C wet locations

Informational note: Even though the “R” stands for “Rubber”, the designation includes other thermoset materials such as XLPE, SBR, CPE and others.

Designations such as THHN (Thermoplastic High Heat resistant, Nylon coated) or any designation beginning with T is considered thermoplastic material and should be avoided unless the equipment manufacturer specifically permits them.

All products within the DRIVEFLEX® series are made with XLPE insulation of type XHHW-2 or RHW-2 depending on model. This means that LUTZE DRIVEFLEX® cables are compliant with the requirements in article 4.4.2.8 NFPA 79.

Ampacity per NFPA 79 (2018 Edition)

12.5.1 The ampacities of conductors shall not exceed the corresponding temperature values given in Table 12.5.1 before any correction factors for ambient temperature or adjustment factors for the number of current-carrying conductors have been applied.

Table 12.5.1: Conductor Ampacity Based on Copper Conductors with 60°C (140°F), 75°C (167°F), and 90°C (194°F) Insulation in an Ambient Temperature of 30°C (86°F)

Conductor Size (AWG)	Ampacity		
	60 °C (140 °F)	75 °C (167 °F)	90 °C (194 °F)
30	—	0.5	0.5
28	—	0.8	0.8
26	—	1	1
24	2	2	2
22	3	3	3
20	5	5	5
18	7	7	14
16	10	10	18
14	20	20	25
12	25	25	30
10	30	35	40
8	40	50	55
6	55	65	75
4	70	85	95
3	85	100	110
2	95	115	130
1	110	130	150
1/0	125	150	170
2/0	145	175	195
3/0	165	200	225
4/0	195	230	260
250	215	255	290
300	240	285	320
350	260	310	350
400	280	335	380
500	320	380	430
600	355	420	475
700	385	460	520
750	400	475	535
800	410	490	555
900	435	520	585
1000	455	545	615

- Notes: (1) Wire types listed in section 12.3.1 of *NFPA 79* shall be permitted to be used at the ampacities listed in this table.
 (2) The sources for the ampacities in this table are Table 310.15(B)(16) of *NFPA 70*.

Correction Factors

Table 12.5.5(a) Ambient Temperature Correction Factors

For ambient temperatures other than 30 °C (86 °F), multiply the allowable ampacity by the appropriate factor shown below.

Ambient Temperature (°C)	Correction Factor		
	60 °C	75 °C	90 °C
21-25	1.08	1.05	1.04
26-30	1.00	1.00	1
31-35	0.91	0.94	0.96
36-40	0.82	0.88	0.91
41-45	0.71	0.82	0.87
46-50	0.58	0.75	0.82
51-55	0.41	0.67	0.76
56-60	—	0.58	0.71
61-70	—	0.33	0.58
71-80	—	—	0.41

Table 12.5.5(b) Adjustment Factors for More Than Three Current-Carrying Conductors in a Raceway or Cable

Number of Current-Carrying Conductors	Percent of Values in Table 12.5.5(a) as Adjusted for Ambient Temperature if Necessary
4-6	80
7-9	70
10-20	50
21-30	45
31-40	40
41 and above	35

Example: Application with a LUTZE DRIVEFLEX® XLPE (C) 1 TSP PVC, Shielded with control pair and an ambient temperature of 43 °C and a required ampacity of 34 Ampere.

- Factor ambient temperature: 0.87
 - Percentage factor current carrying conductors: 80
- 55 A x 0.87 x 0.8 = 38 A > 34 A
 Our recommendation is a AWG8 + 1 TSP AWG14,
 Item no. A2170804

Note: The given values are reference numbers to calculate the required cable sizes. LUTZE Inc. is not responsible for the conformity of the values provided by the NFPA.

Ampacity per National Electric Code (USA)

Calculation of the max. ampacity (Based on “NEC 2020 Edition”)

Allowable Ampacities of Insulated Conductors Rated 0 Through 2000 Volts, 60°C - 90°C (140°F - 194°F), with Not More Than Three Current Carrying Conductors in Raceway, Cable or Earth (Directly Buried), Based on Ambient Temperature of 30°C (86°F)* (Based on Table 310.16)

Copper size AWG or kcmil	Temperature Rating of Conductor		
	60 °C (140 °F) Types TW, UF	75 °C (167 °F) Types RHW, THHW, THW, THWN, XHHW, XHWN, USE, ZW	90 °C (194 °F) Types TBS, SA, SIS, FEP, FEPB, MI, PFA, RHH, RHW-2, THHN, THHW, THW-2, THWN-2, USE-2, XHH, XHHW, XHHW-2, XHWN, XHWN-2, XHHN, ZW-2
18**	–	–	14
16**	–	–	18
14**	15	20	25
12**	20	25	30
10**	30	35	40
8	40	50	55
6	55	65	75
4	70	85	95
3	85	100	115
2	95	115	130
1	110	130	145
1/0	125	150	170
2/0	145	175	195
3/0	165	200	225
4/0	195	230	260
250	215	255	290
350	260	310	350
500	320	380	430
750	400	475	535

* Refer to 310.15(B)(1) for the ampacity correction factors where the ambient temperature is other than 30°C (86°F)

** Refer to 240.4(D) for conductor overcurrent protection limitations

Correction Factors

Ambient temperature (Based on Table 310.15(B)(1))

For ambient temperatures other than 30 °C (86 °F), multiply the allowable ampacities shown above by the appropriate factor shown below.

Ambient temp. °C	60 °C (140 °F)	75 °C (167 °F)	90 °C (194 °F)
21-25 (70-77 °F)	1.08	1.05	1.04
26-30 (78-86 °F)	1	1	1
31-35 (87-95 °F)	0.91	0.94	0.96
36-40 (96-104 °F)	0.82	0.88	0.91
41-45 (105-113 °F)	0.71	0.82	0.87
46-50 (114-122 °F)	0.58	0.75	0.82
51-55 (123-131 °F)	0.41	0.67	0.76
56-60 (132-140 °F)	–	0.58	0.71
61-65 (141-149 °F)	–	0.47	0.65
66-70 (150-158 °F)	–	0.33	0.58
71-75 (159-167 °F)	–	–	0.50
76-80 (168-176 °F)	–	–	0.41
81-85 (177-185 °F)	–	–	0.29

Number of current carrying conductors (Based on Table 310.15(C)(1))

Adjustment factors for more than three current carrying conductors in raceway or cable.

Number of Current-Carrying Conductors	Percent of Values in Tables 310.16 Through Table 310.19 as Adjusted for Ambient Temperature if Necessary
1-3	100
4-6	80
7-9	70
10-20	50
21-30	45
31-40	40
40 and more	35

Number of conductors is the total number of conductors in the raceway or cable adjusted in accordance with 310.15(C)

Example: Application with a LUTZE DRIVEFLEX® XLPE (C) 1 TSP PVC, Shielded with control pair and an ambient temperature of 43 °C and a required ampacity of 34 Ampere.

- Factor ambient temperature: 0.87
 - Percentage factor current carrying conductors: 80
- 55 A x 0.87 x 0.8 = 38 A > 34 A
Our recommendation is a AWG8 + 1 TSP AWG14, Item no. A2170804

Note: The given values are reference numbers to calculate the required cable sizes. LUTZE Inc. is not responsible for the conformity of the values provided by the NEC.

Notes:

Type of Motor is design B

Class of Service is continuous

Duty-Cycle Service is continuous

Conductor is copper 75°C

Ambient temperature is 26-30°C

Values are based on 2020 NEC 430.250 multiplied x 1.25

Ampacities are based on 2020 NEC 310.16, 75°

Cables with Signal pair(s) have been de-rated in accordance to 2017 NEC 310.15(C)(1)

†NEC430.22(G) may permit the use of 18 AWG and 16 AWG conductors provided specific circuit protection, overcurrent protection, and overload protection is utilized as described in (G)(1) or (G)(2).

*All values given are calculated based on 2020 NEC. For actual amperage consult your Motor/Drive manual and your local code restrictions. This guideline is simplified in order to select cable sizes. This document has no legal meaning, the interpretation of the NEC code has to be verified by the Authority Having Jurisdiction (AHJ).

LUTZE Technical Overview

Simplified Motor, VFD and Servo Cable Selection by Horsepower (HP) at 90°C

Part#	Amps	AWG (POWER)	230V-3 Ø	460V-3 Ø	575V-3 Ø
A1061804	4C	14	18 AWG	Up to 5 Amps See NEC 430.22(G)†

LUTZE Technical Overview

Ingress Protection (IP) Class Designation according to EN 60529

The protection of electrical equipment through corresponding enclosure is specified with code letters and code numbers. This protection class designation consists of the letters "IP" and two code numbers from 0 to 8. The first code number stands for the protection against contact and foreign substances, the second number specifies the degree of protection against water. The higher the respective code number is, the higher the offered protection. The protection class for each product is specified in the respective technical information.

For example:

IP 65	Code letter IP	IP	
	First code number	6	corresponds to: Protection against entrance of dust
	Second code number	5	corresponds to: Protection against sprayed water

For protection against contact and foreign substances

First code number	Protection scope designation	Explanation
0	No protection	No special protection of persons from accidental contact with standing or moving parts under voltage. No protection of the equipment against entry of solid foreign substances.
1	1 Protection against foreign substances > 50 mm	Protection against accidental contact of large area surfaces of standing and internally moving parts under voltage, e.g. with the hand, but no protection against intentional access to these parts. Protection against entry of solid foreign substances with a diameter larger than 50 mm.
2	Protection against foreign substances > 12 mm voltage	Protection against contact by the fingers of standing or internally moving parts under voltage. Protection against entry of solid foreign substances with a diameter larger than 12 mm.
3	Protection against foreign substances > 2.5 mm tools	Protection against contact of standing or internally moving parts under voltage with wires or similar of a thickness larger than 2.5 mm. Protection against entry of solid foreign substances with a diameter larger than 2.5 mm.
4	Protection against foreign substances > 1 mm	Protection against contact of standing or internally moving parts under voltage with tools, wires or similar of a thickness larger than 1 mm. Protection against entry of solid foreign substances with a diameter larger than 1 mm.
5	Protection against dust accumulation	Full protection against contact of standing or internally moving parts under voltage. Protection against dust accumulation. The entry of dust is not fully prevented but the dust may not enter in such quantities that the functioning is impaired.
6	Protection against dust accumulation	Full protection against contact of standing or internally moving parts under voltage. Protection against entry of dust.

For water protection

Second code number	Protection scope designation	Explanation
0	No protection	No special protection.
1	Protection against vertically falling dripping water	Water drops that fall vertically may not have any damaging effect.
2	Protection against dripping water falling at an angle	Water drops that fall at an arbitrary angle of up to 15° to vertical may not have any damaging effect.
3	Protection against sprayed water	Water that falls in an arbitrary angle up to 60° to vertical may not have a damaging effect.
4	Protection against splashed water	Water that is splashed from all directions against the equipment may not have a damaging effect.
5	Protection against water projected from a nozzle	Water projected from a nozzle that is aimed at the equipment from all directions may not have any damaging effect.
6	Protection against flooding	Water may not enter into the equipment in damaging amounts during temporary flooding (e.g. by heavy seas)
7	Protection against immersion	Water may not enter in damaging amounts if the equipment is immersed in water for the defined pressure and time conditions.
8	Protection against submersion	Water may not enter in damaging amounts if the equipment is submerged in water for the defined pressure and indefinite amount of time.
9	Protection against high temperature water jets	Water may not enter in damaging amounts if the equipment is subjected to predefined high temperature, high pressure water jets from four angles for three minutes.

Enclosure Type Ratings According to UL 50E and NEMA 250-2003

In the United States the protection level of electrical enclosures is standardized using Type ratings, which have been defined by the National Electrical Manufacturers Association (NEMA). These ratings specify the level of protection that a complete enclosure provides against foreign objects such as dust and fibers, liquids, coolants, and corrosive agents. Enclosures are rated based on the complete enclosure installation, including pass-through devices, ports, and entry points when properly installed.

For protection against contact and foreign substances

Type Rating	Description
Type 1	Constructed for indoor use to provide a degree of protection to personnel against access to hazardous parts and to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt).
Type 2	Constructed to meet the requirements of Type 1 and to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (dripping and light splashing).
Type 3	Constructed for either indoor or outdoor use to provide a degree of protection to personnel against access to hazardous parts; to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt and windblown dust); to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (rain, sleet, snow); and that will be undamaged by the external formation of ice on the enclosure.
Type 3R	Constructed to meet the requirements of Type 3 but does not include protection against windblown dust.
Type 3S	Constructed to meet the requirements of Type 3 and for which the external mechanism(s) remain operable when ice laden.
Type 4	Constructed for either indoor or outdoor use to provide a degree of protection to personnel against access to hazardous parts; to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt and windblown dust); to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (rain, sleet, snow, splashing water, and hose directed water); and that will be undamaged by the external formation of ice on the enclosure.
Type 4X	Constructed to meet the requirements of Type 4 with an additional level of protection against corrosion.
Type 6	Constructed for either indoor or outdoor use to provide a degree of protection to personnel against access to hazardous parts; to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt); to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (hose directed water and the entry of water during occasional temporary submersion at a limited depth); and that will be undamaged by the external formation of ice on the enclosure.
Type 6P	Constructed to meet the requirements of Type 6 with an additional level of protection against corrosion.
Type 12	Constructed (without knockouts) for indoor use to provide a degree of protection to personnel against access to hazardous parts; to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt and circulating dust, lint, fibers, and flyings); and to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (dripping and light splashing).
Type 12K	Constructed (without knockouts) for indoor use to provide a degree of protection to personnel against access to hazardous parts; to provide a degree of protection of the equipment inside the enclosure against ingress of solid foreign objects (falling dirt and circulating dust, lint, fibers, and flyings); and to provide a degree of protection with respect to harmful effects on the equipment due to the ingress of water (dripping and light splashing).
Type 13	Constructed to meet the requirements of Type 12 and to provide a degree of protection against the spraying, splashing, and seepage of oil and non-corrosive coolants.

LUTZE Technical Overview

Torque Recommendations for LUTZE Cable Fittings - Plastic and Metal Dome Nuts

Nominal Size	Recommended Torque in Nm Plastic	Recommended Torque in Nm Metal
NPT 3/8"	2.5	4.5
NPT 1/2"	3.0	5
NPT 3/4"	5.0	7.0
NPT 1"	5.0	7.0
PG7	2.5	6.25
PG9	3.75	6.25
PG11	3.75	6.25
PG13.5	3.75	6.25
PG16	5.0	7.5
PG21	7.5	10.0
PG29	7.5	10.0
PG36	7.5	10.0
PG42	7.5	10.0
PG48	7.5	10.0
M12x1.5	1.0	5
M16x1.5	2.5	5
M20x1.5	4.0	7.5
M25x1.5	6.0	10
M32x1.5	7.0	15
M40x1.5	7.5	18
M50x1.5	8.0	20
M63x1.5	9.0	20

Torque Recommendations for LUTZE Cable Fittings – EMC Style

Nominal Size	Recommended Torque in Nm Body (Dome Nut)	Recommended Torque in Nm locknut
NPT 3/8"	6.5	-
NPT 1/2"	8.0	-
NPT 3/4"	16.0	-
NPT 1"	22.0	-
M12x1.5	5.5	3
M16x1.5	6.5	4
M20x1.5	8.0	5.5
M25x1.5	16.0	6
M32x1.5	22.0	6
M40x1.5	42.0	12
M50x1.5	42.0	18
M63x1.5	43.0	25

Torque Recommendations for LUTZE Cable Fittings – CEX Style

Nominal Size	Recommended Torque in Nm Body (Dome Nut)			Recommended Torque in Nm locknut
	3 seal rings	2 seal rings	1 seal ring	
NPT 2"	190 ± 3	125 ± 3	140 ± 3	-
NPT 2 1/2"	130 ± 3	125 ± 3	120 ± 3	-
NPT 3"	123 ± 3	115 ± 3	107 ± 3	-
M63x1.5	190 ± 3	125 ± 3	140 ± 3	25 ± 2.5
M75x1.5	130 ± 3	125 ± 3	120 ± 3	30 ± 2.5
M90x1.5	123 ± 3	115 ± 3	107 ± 3	35 ± 2.5

The specified values are recommended for achieving the protection class IP68 at 5 bar. Please choose the suitable torque for the material and cable application. The actual crush resistance of each cable must be considered and you may have to significantly reduce the torque. The values shown are for reference only.

LUTZE Product Overview

Cable Solutions

LUTZE specializes in flexible and continuous motion industrial control, power and network cables, such as LUTZE SILFLEX®, LUTZE SUPERFLEX®, MOTIONFLEX® flexing and twisting cables and DRIVEFLEX® VFD cables, for various applications in industrial automation.

LUTZE SILFLEX® FBP cables meet both UL and FDA requirements providing an innovative solution for food and beverage processing applications.

Wire and cable management components such as Cablefix® X and Cablefix® One cable entry systems complement the offering for industrial automation.

Connectivity Solutions

In addition to industrial flexible and continuous motion cables, LUTZE offers servo cable assemblies according to SIEMENS 6FX, Allen-Bradley® 2090 and Bosch Rexroth Indramat standards.

Cabinet Solutions

LUTZE *AirSTREAM* wiring system saves space, time and cost. *AirSTREAM* is an aluminum frame that replaces the traditional back panel and wire duct for mounting and wiring of electrical components in a control enclosure. It shortens wiring times and improves heat dissipation within the cabinet to enhance component longevity.

Control Solutions

LUTZE offers din rail mountable compact power supplies, industrial Ethernet switches, LCIS relays and intelligent control circuit protection with the LUTZE LOCC-Box.
