

Model Number

NRB8-18GM40-E2-IO-C-V1

Features

- 8 mm flush ٠
- Reduction factor = 1 •
- Magnetic field resistant
- Weld Immune
- IO-link interface for service and process data
- Switch point mode or window mode can be set
- Switching function, stability alarm and pulse extension can be set

Description

Reduction factor 1 sensors reliably detect different metals with the same switch state. The integrated IO-Link interface enables clear identification of the sensor and diagnosis of the sensor condition. When using the sensor, parameters and operating modes can be optimally configured specifically for the intended application. In addition to setting the switching function and a pulse extension, the user can select either switch point mode or window mode in combination with a stability alarm. In switch point mode, the stability alarm signals the detection of an object in the area between the assured operating distance and operating distance $\boldsymbol{s}_n.$ In window mode, it signals the detection of an object below the window between operating distance \boldsymbol{s}_n and the nearest operating distance. A stability alarm is displayed to the user via a flashing LED and process data.

Accessories

IO-Link-Master02-USB IO-Link master, supply via USB port or separate power supply, LED indicators, M12 plug for sensor connection BF 18 Mounting flange, 18 mm EXG-18 Quick mounting bracket with dead stop V1-G Female connector, M12, 4-pin, field attachable V1-W Female connector, M12, 4-pin, field attachable V1-G-2M-PUR Female cordset, M12, 4-pin, PUR cable V1-W-2M-PUR Female cordset, M12, 4-pin, PUR cable
