After-travel	max. 18 mm

Ambient conditions

Temperature resistance	
- min. Temperature resistance	-50 °C short duration -30 °C long duration
- max. Temperature resistance	+170 °C short duration +140 °C long duration
Protection class	IP67
notice	The protection class IP 67 applies to the entire signal transmitter.

Dimensions

Dimensions	
- Width	25 mm
- Height	approx. 40 mm
- Length	5000 mm

notice

If a higher resistance is required, choose safety edge profiles with 20 µm plastic coating. The coating must be submitted to low mechanical loads only.

In the extremities of the safety edge at approx. 60 mm (SE 40) or 50 mm (SE 70) finger guard is not guaranteed. Upon actuation of this area, the transmitter/receiver is pushed into the lower profile section and the switching signal is evaluated, but the required forces are high though.

If this restriction is not acceptable for the specific application, constructive measures must be taken.
