Protection rating according to EN 60 529. Explanation page 318

Number of possible tones

Working temperature in °C, highest and lowest rating

Flash energy in watt seconds (Joules)

Net weight excluding packaging, in grams, ie. kgs

Impact resistance in Joules

Volume in decibels (dB (A)) measured at 1m distance

Suitable for triggering via PLC

Key to Pictograms "Marks of conformity and protection types"

All WERMA products bearing the CE mark conform to current EU regulations and are tested for adherence to EMC codes.

Products in compliance with the AS-Interface specifications (EN 50295, IEC 62026-2) and which have been certified by the AS International Association are marked with the AS-Interface certification logo (shadowed logo).

This mark confirms that the product is suited to the intended application and conforms to the relevant standards and guidelines. In addition, the technical specifications provided by the manufacturer are certified by the TÜV.

The Eurasian conformity symbol EAC is granted by the customs union Russia/Bellarussia/Kazakhstan. The EAC symbol confirms that the product has undergone the conformity procedures and has met its technical requirements.

Products with this mark have been tested and registered by UL for the North American market. This certification is also valid for Canada. The WERMA production facility is audited by UL.

German Lloyd sets technical, quality and safety standards for the industrial and maritime sector.

Products with the addendum "Class 2" may only be used in electric circuits that have been constructed in accordance with UL Class 2.

In addition to the classification of ships of all types, German Lloyd is also active as a world-wide technical monitoring society.

The aim of EHEDG (European Hygienic Engineering and Design Group) is to prepare and publish guidelines for hygienic engineering in the manufacturing and packaging of foodstuffs. The certification by this consortium confirms compliance with strict design criteria for avoiding weaknesses in construction and for minimising the risk of contamination.

The IECEx certification confirms that the product has been certified as suitable for use in explosion endangered applications. The product has been manufactured at a site which is continuously assessed by the responsible authorities. The certificate is recognised in all countries participating in the IECEx system.

The Fraunhofer Institute certificate for production engineering and automation (IPA) is a test label for products which have been qualified according to recognised standards and guidelines as to their objective suitability for use in clean rooms.

The special organisation of the United Nations has given the ICAO (International Civil Aviation Organisation) the task of establishing and developing uniform regulations governing the safety and economic viability of civil aviation processes. The guidelines of the ICAO will only be applicable to all member states but must also be transferred into local statutes of law.

Devices bearing this mark and number are authorised for use in hazardous areas. Ex devices guarantee a high level of resistance to extreme conditions.

The VdS guidelines contain the standards which signal devices must fulfil in order to be built into intruder and fire alarm systems.

General Information

General notes on catalogue descriptions

Sound levels and frequencies

The specified sound levels are based on tests carried out in our factory. These levels are typical for the specific products and inevitably subject to variation. Mounting position and/or type can alter specifications.

The rated frequencies of buzzers are also dependent on the tolerances of the individual components and can vary up to 500 Hz from the quoted rating. No frequency rating can be stated for horns as the spectrum is so wide that any stated rating cannot be accurate. The fundamental frequency for AC devices is 100 Hz, for DC devices c. 200 - 500 Hz. This means that they emit a deeper tone than piezo devices which have values typically between 2000 and 3000 Hz.

Current consumption

The current consumption levels quoted are standard values. The ratings are based on the virtual value for AC, i.e. the average value for Dc.

The measured value is normally calculated over a period of 10 seconds. The highest current consumption rating can be considerably higher than the calculated rating.

The starting current of a product can be above the rated current by ten fold.

Assured values

The technical specifications of our products have been rigorously and thoroughly tested. A quality guarantee according to § 463 BGB is however only applicable where expressly stated.

WERMA is only liable for damage arising from the failure of guaranteed properties when the guarantee was expressly intended to protect the customer from this damage.

Measurements, weights, ratings and illustrations are subject to technical amendment.

Product descriptions

The product descriptions found in the price list and on all documents are made up of the following information:

Product type: Electronic Buzzer LED Permanent Beacon etc.	Fixing: BM = Base mounting BWM = Base/Bracket mounting EM = Installation mounting RM = Tube mounting WM = Bracket mounting	Tone type: 32 tones 4 tones etc. alternating cont./pulse continuous pulse	Voltage: 12 V 24 V 115 V 230 V etc.	Colour: BK = black BU = blue CL = clear GN = green GY = grey RD = red YE = yellow WH = white MC = multicolour
---	--	---	---	---

Examples:

Electr. Buzzer EM Continuous tone 115 V UC
 LED Permanent Beacon EM 24 V DC RD

Note: Colour order of a signal tower from the bottom to the top

MTTF values

"MTTF" is the abbreviation for **Mean Time To Failure** and is also described as the average life cycle or "MTTF_d" (= the average time until failure leading to a dangerous situation).

The European Norm **EN ISO 13849-1** has caused a new significance to be attached to "MTTF" values, because they are used to evaluate machine safety within the conformity tests.

The MTTF is a statistical value, which is calculated by **means of testing or experience** of past values. It does not provide a guaranteed life duration or a guaranteed functional period.

MTTF values have been calculated for a variety of **WERMA products**. Please contact us for further details.

Protection ratings

Protection ratings for signal devices: Protection ratings for housings DIN EN 60529 (DIN VDE 0470 IEC 60529).

First digit: degree of protection against contact with dangerous parts and the intrusion of foreign particles.	Second digit: degree of protection against water.
IP 0X no protection	IP X0 no protection
IP 1X protection against contact with the back of the hand.	IP X1 protection against vertically falling water drops.
IP 2X protection against finger contact with live or moving parts in the appliance. The test finger with Ø 12 mm and 80 mm length must not come into contact with dangerous parts. A ball of 12.5 mm diameter should not be able to fully penetrate the housing.	IP X2 protection against water drops so long as the device is tilted to an angle of 15°.
IP 3X test bar Ø 2.5 mm may not penetrate the housing.	IP X3 protection against water spraying at any angle up to 60° to the vertical.
IP 4X a wire with Ø 1 mm may not penetrate the housing.	IP X4 protection against water spraying at any angle.
IP 5X complete protection against dust cannot be guaranteed, but dust is not able to accumulate in such a way as to impair the operation of the device.	IP X5 protection against jets of water directed from any angle at the appliance.
IP 6X total protection against dust (no penetration).	IP X6 protection against heavy seas. A strong jet of water may not harm the appliance.
	IP X7 protection against occasional immersion.
	IP X8 protection against permanent immersion.
	IP X9k protection against water during high pressure / steam cleaning.

Comparison between NEMA and IEC protection ratings - classification

NEMA Protection Type Number	Protection	IEC Protection Classification Designation
1	Falling dirt	IP 10
2	Dripping water and falling dirt	IP 11
3	Wind blown dust, rain and hail; no damage due to external ice formation	IP 54
3 R	Rain and hail; no damage due to external ice formation	IP 14
3 S	Wind blown dust, rain and hail; can be operated even with external ice formation	IP 54
4	Wind blown dust, rain, splashes and a direct jet of water; no damage due to external ice formation	IP 56
4 X	Wind blown dust, rain, splashes and a direct jet of water; no damage due to external ice formation, corrosion protection	
5	Dust, falling dirt, dripping non-corrosive liquids	IP 52
6	Direct jet of water, temporary submersion; no damage due to external ice formation	IP 67
6 P	Direct jet of water, longer periods of submersion; no damage due to external ice formation	IP 67
12 and 12 K	Circulating dust, falling dirt, dripping non-corrosive liquids	IP 52
13	Dust, splashes of water, oil, non-corrosive liquids	IP 54

Cannot be used to convert IEC Classification Designations to NEMA Type Numbers.

Note: This comparison is based on tests specified in IEC Publication 60529.

AS-Interface

AS-Interface, the Actuator Sensor Interface and its distinctive 'yellow cable' is one of the most innovative networking solutions in modern automation technology.

Conceived in 1990 as a cost-efficient, feature-rich alternative to conventional hard-wiring, AS-Interface has now been proven in hundreds of thousands of products and applications spanning the entire automation spectrum.

AS-Interface offers many of the benefits of more powerful and expensive fieldbuses, but at much lower cost and at much simpler application. The complete network is controlled automatically by a 'master' which polls the network sending and receiving data from each connected device in turn. It automatically senses and registers any connected devices, thus neither configuration nor application-specific software for the master is necessary.

Unique technology

Due to the cable structure, AS-Interface offers a unique mounting technology. Without any cutting or removal of insulation, sharp pins penetrate the cable insulation making the electrical contact as the connection elements are closed. This technology ensures protection up to IP 65.

Cost savings

In general, applications from as few as ten sensors and actuators to very large systems can benefit, especially when the whole life cost advantages are taken into account. Distributing the input and output functionality is one starting point for cost savings, enabling point to point wiring systems to be reduced to a single cable, eliminating or reducing cable trees, service cabinets and multiple connectors. The special AS-Interface connection technology replaces labour-intensive wiring. The tree structure permits better optimised system design and improved layouts, bringing easier installation and maintenance. Network configuration is eliminated.

System Survey

- Single master-slave principle
- Up to 62 slaves with one master
- Per slave up to 4 digital inputs + 4 digital outputs
- Max. 248 digital inputs and outputs
- Additional 4 parameter bits/salve
- Also possible: analogue I/O
- Electronic addressing of slaves
- Free structure of the network

How AS-Interface® works

- AS-Interface® - a bus system, which substitutes parallel wired installation from pic to sensors and actuators
- Data and energy in the same cable
- 1 Master and max. 62 slaves
- Total cycle time < 10 ms - with max. number of 32 slaves
- Master-slave principle: The master calls and the slave answers immediately

Cable power

The yellow cable can carry up to 8 A, which means that no additional wiring is required in typical installations. Several hundred mA may be drawn by a single slave device on the network. Where higher power is needed, or for emergency stop situations, a black secondary DC or AC power cable offers complementary advantages. If round cable is preferred, a wide variety of screw and push-fit termination modules offer this, with no performance compromise.

Products with AS-Interface

WERMA Signaltechnik GmbH & Co. KG has been a member of the AS - Interface® Association since 1996.

WERMA's product range encompasses the LED Installation Beacon (Multicolour) 239 is available for AS-Interface®. This is suitable for the extended addressing (A/B engineering) of up to 62 modules. This beacon is provided with electricity via the bus.

WERMA's product range also contains products with AS-Interface® for KombiSIGN 71 as well as custo-mised developments. The entire BUS electronic system is integrated in the element placed at the base of the signal tower. The KombiSIGN AS-Interface® elements offer the customer beneficial features such as an addressing socket and status LEDs. A user-friendly sliding switch inside the module can be used to provide the power supply required for the signal towers from an external 24 V auxiliary voltage or via the integrated bus bypass.

The generation of light - a summary of the possibilities

Light can be generated in various ways. In the field of signalling technology LEDs are used in the majority of applications.

✓ LED

Light emitting diodes are constructed using certain semiconductors. Foreign atoms are built into the semiconductor with the purpose of optimising the conductivity. Half of the semiconductor (n-region) is doped with foreign atoms that contain one bonding electron more than the semiconductor atom. This surplus atom can move freely and increases conductivity.

The other half (p-region) is doped with foreign atoms containing one electron less than the semiconductor. When the LED is switched on, these faults ("holes") fill up with free electrons (recombination). Energy in the form of radiant photons is hereby released. The energy and therefore the colour of the light emitted is determined by the material the semiconductor is made of; e.g. GaAsP (Gallium Arsenic Phosphide) results in red light.

✓ Bulbs

A tungsten filament is heated up to a high temperature, so radiating energy over a wide wavelength. This is perceived as light similar to sunlight. The tungsten filament evaporates with time. When the tungsten content falls below a certain level, the maximum life duration of the bulb is reached. As tungsten oxidises quickly and is destroyed when it comes into contact with air, the filament must be kept in a non-oxidising atmosphere such as vacuum. This leads us to the familiar light bulb with its sealed glass body.

✓ Halogen bulbs

These are bulbs wherein the tungsten filament is enclosed by a small amount of halogen. The resulting chemical reaction has the effect of lengthening the life of the tungsten and stabilising the light output throughout the entire life duration of the bulb.

✓ Electric discharge tubes

Xenon flash tubes are widely used in signalling technology. They consist of a glass tube filled with the inert gas xenon. A sufficiently high voltage leads to a discharge of energy with a spark gap and a flash of high intensity.

Fundamental units of light magnitude

The fields of lighting and signalling technology differentiate between fundamental units to define light itself. The most important of these are the units Lumen, Candela and Lux.

✓ Lumen (unit lm)

Light current is measured in Lumen; this is the unit for the entire visible light output of a light-emitting source. The light current is defined by the following formula known as the brightness characteristic:

Light current ϕ [in lm] = radiation capacity x brightness characteristic $V(\lambda)$

The brightness impression upon the human eye is based on a sensitivity curve $V(\lambda)$ which reproduces the sensation felt by the eye in relation to the wavelength. The maximum point on this curve is at about 555 nm; we see best at this wavelength; $V(555 \text{ nm}) = 1$.

✓ Candela (unit cd)

In signalling technology only the part of the light current that is emitted in a certain direction is of importance. This light intensity is measured in Candela. It is defined by the light current of a lamp and the steradian measure

$$\text{Light intensity [in cd]} = \frac{\text{Light current } \phi}{\text{Steradian measure } \Omega}$$

A complete sphere has a dihedral angle of $\Omega = 4 \pi$ sr. sr stands for the steradian and is the unit for the dihedral angle.

Example: a household candle emitting a light intensity of 12,566 Lumen has a light intensity in relation to the steradian measure $\frac{12,566 \text{ lm}}{4 \pi \text{ sr}} \approx 1 \text{ cd}$.

This explains the name: candela is the Latin word for candle.

✓ Lux (unit lx)

Illumination density is an important unit in lighting installations. It is the measure of the brightness with which an area is illuminated. Whereas light intensity (in cd) is a property of a light source, illumination density is calculated in regard to the area to be illuminated.

Where the light current emitted is constant, the following formula is applicable:

$$\text{Light density E [in lux]} = \frac{\text{Light current } \phi}{\text{Surface A}}$$

Signalisation Index

The signalisation index provides an easy opportunity to select the correct WERMA product. Derived from the test measurements of the respective products and the subjective signal perception, this index quickly leads you to the appropriate product. In this way you can very easily find the optimal product for your individual application.

Why does WERMA incorporate the subjective signal perception into the signalisation index? ...

... because physical parameters alone are only conditionally comparable with regard to signal effect. For example, a dynamic light is generally more strongly perceived than a static light. A blinking light therefore has a greater signal effect than a permanent light - even though the light output is exactly the same. This effect is even stronger for an EVS/flickering light.

Permanent light and LED Permanent light

With the assistance of a permanent light or an LED permanent light the operator is made aware of a specific condition or is instructed to carry out a certain course of action.

For safety reasons signal beacons are increasingly equipped with light emitting diodes. The failure of optical signal devices is significantly reduced as a result of the longer life duration of LEDs. Furthermore, LEDs offer a range of advantages compared to conventional light bulbs for example lower current consumption, greater resistance to shocks, vibrations and other mechanical stress.

LED Beacons (Multicolour)

As well as offering traditional single coloured beacons, Werma has several multicolour LED products which give the user multiple colour choices in just one beacon.

The 816 LED beacon with USB connection uses RGB LED technology from which you can select up to 200,000 colour variants also in different light effects, such as permanent, blink or special flash.

The LED multicolour beacons 239 and 816 with M12 connectors offer up to 7 colours and enable you to signal several different status conditions with just one beacon.

Xenon Flashing Light

The deployment of a flashing signal can generate even more attention than a permanent light. The reason for this is to be found in the very short flash duration.

Inside each Xenon flashing beacon there is a capacitor which stores electrical energy. Within the space of a few milliseconds this energy is discharged within the flash tube, generating a very intense light impulse.

The life duration of a flash tube is heavily dependent on the respective load. The average life duration in permanent operation is 4×10^6 flashes.

(LED) Flashing or Blinking Light and LED EVS Signal Beacon

The deployment of a flashing or blinking signal can generate even more attention than a permanent light. Blinking and flashing beacons nowadays often employ long-life LED technology which has a significantly longer life duration of up to 50,000 hours with a considerably reduced power consumption.

The stochastic, random flickering light EVS (Enhanced Visibility System) has been developed by WERMA on a neurobiological basis. As deployed in LED Beacons, this technology succeeds in generating an optimal attention level never previously reached by existing signal devices.

WERMA employs LEDs for its EVS system. A microprocessor triggers random light signals, which make the light appear extremely "agitated", thus generating a continuously high attention level amongst those in the vicinity - even when viewed out the corner of the eye.

Rotating Mirror Beacon and LED Rotating Signal Beacon

Inside each rotating mirror beacon is a halogen bulb, and a mirror to deflect the light in one direction. This generates a rotating light beam.

In contrast to conventional Rotating Mirror Beacons, the LED version generates the rotating signal by means of a set of LEDs which are triggered in sequence.

As no mechanical components have been used at all, the beacon is completely maintenance-free.

LED Element „ultrabright“

Good visibility, even in direct sunlight, is a basic precondition for the reliable deployment of signal devices in outdoor areas. This is a standard feature of the signal towers and beacons from WERMA Signaltechnik. There are however applications which place even more extreme demands on the visibility of optical signalling.

Up to 20 times brighter

Thanks to its sophisticated triggering, the innovative LED element "ultrabright" is up to 20 times brighter than conventional LED beacons - making it almost certainly the **brightest permanent light** that the world of signalling technology currently has to offer.

Furthermore, the **intelligent electronics** ensure that the LEDs operate at maximum brightness, depending on the ambient and operating temperatures. The "ultrabright" LED element is therefore always working at its optimum, and the energy-saving LED technology ensures that power consumption is kept to a minimum.

EVS - Enhanced Visibility System

A groundbreaking innovation in LED technology opens up a completely new dimension in optical signalling. Enhanced Visibility System, or the electronic improvement of visibility, EVS for short, is the name WERMA has given to this latest development which promises to bring about a revolution in signal technology.

This technology is generally used when a particularly high level of awareness should be generated.

Irregular light impulses can circumvent the brain's filter function. Random light signals fail to generate an acclimatisation effect and the brain is unable to escape the stimulus, even when the flickering continues for an extended period.

EVS signal devices communicate highly urgent situations

As a result of the extremely powerful signal effect, the EVS light is especially suited to signalling acute or highly important conditions. The EVS element can also be deployed in hazardous situations or in areas where immediate action is required.

Integrated into KombiSIGN Signal Towers, the EVS LED Element generates a highly attention-grabbing signal (see page 32 and 39).

This innovative technology is also used in the 853 (page 165), 280 (page 158) and 829 series (page 148 onwards) and in the optical-audible combinations 444 (page 277 onwards) and 43x (page 270 onwards).

EVS - unique light effect using LED technology

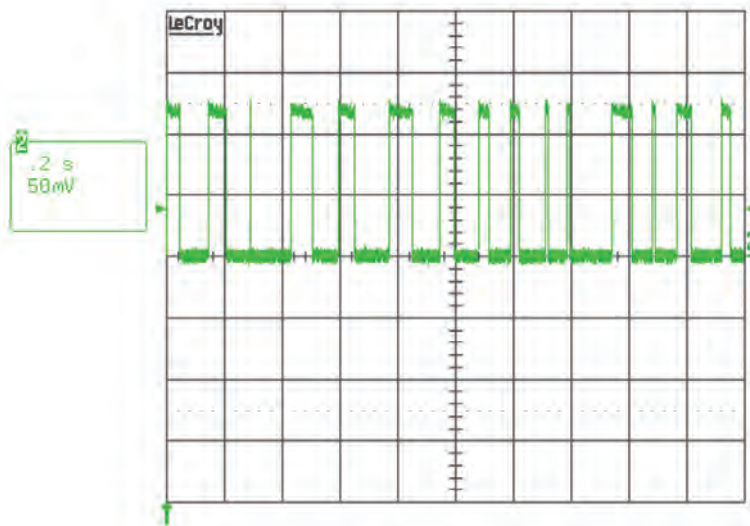

For the EVS system WERMA employs light emitting diodes. A microprocessor generates random light signals.

This gives the light a very "agitated" character which proves highly effective in drawing the attention of those in its vicinity - even when seen out of the corner of the eye.

Up to now LED signal devices have confined themselves to imitating the light effects of light bulbs or xenon flashes, EVS however utilises the strengths of light emitting diodes. LEDs are capable of generating the required high flickering frequency with ease - frequencies which xenon flashes are for example incapable of generating.

Further advantages of LEDs are the resistance to vibration, their long life duration as well as their low current consumption.

Typical 2 second section of an EVS LED element's illumination sequence

Acoustics in Signalling technology

✔ Loudspeakers (electro-dynamic sound generation)

A loudspeaker converts an alternating electric current into sound waves. This occurs by means of the interaction between the electric current and a permanent magnet. The coil is positioned within the magnetic field of the permanent magnet. When an electric current is applied to the coil, the Lorentz force generated leads to a deflection of the coil, causing the membrane to vibrate.

As a result of the centering spider this proceeds in an up and down motion. It centres the coil and, together with the bead, ensures that it returns to the resting position.

With the use of the appropriate size of membrane and material, as well as different drives (coils and permanent magnets), loudspeakers can be optimised for a variety of different frequency ranges.

✔ Acoustic capsule (electromagnetic sound generation)

The acoustic capsule belongs to the group of electromagnetic sound generators. This principle was previously used for telephone earpieces. Within the capsule a permanent magnet serves to pre-magnetise the armature which is connected to the membrane. This is made to oscillate and these oscillations are then converted into audible tones. The acoustic capsule is characterized by a relatively simple construction and a compact form and displays a high degree of effectivity.

✔ Piezo disc

Piezoelectricity (also known as the piezoelectric effect, or for short: piezo effect) refers to the interaction of mechanical pressure (Greek piezein = to press) and electrical currents in solid bodies. It describes the phenomenon whereby the deformation of certain materials leads to the generation of an electric charge at the surface (direct piezoelectric effect).

In a reverse process these materials (predominately crystals) deform when a voltage is applied. The deflection is relatively small so they need to be transmitted to a membrane, from where the oscillations excite air molecules which are then perceived as sound.

Principle acoustic parameters

✓ Sound output level

The sound output level L_p refers to the logarithmic relationship of the square of the sound output of an acoustic event to the square of the reference value $p_0 = 20 \mu\text{P}$. The result is given in decibels (abbreviation dB).

$$L_p = 10 \log_{10} \left(\frac{p_1^2}{p_0^2} \right) \text{ dB} = 20 \log_{10} \left(\frac{p_1}{p_0} \right) \text{ dB}$$

When indicating an absolute level (with reference to the standardized reference level p_0 the abbreviation "SPL" (sound pressure level) is added.

With intermediate to high levels and frequencies a sound output difference of 10 dB is heard as approximately twice as loud. Differences of 3 dB are clearly audible. The perceived sound level is not just dependent on the sound output level, but also on the spectrum of the sound signal and its temporal progression. Single tones are perceived as being considerably louder than a broadband audible signal with the same sound output level. Audible signals with sharply changing levels are also perceived as being significantly louder than uniform audible signals with the same average level.

Weighting curves (A, B and C according to DIN EN 61672-1, formerly IEC/DIN 651) are the curves from weighting filters that are applied to the sound output signal. They are designed to reproduce a similar frequency response as that of the human ear for a specific sound level. However they are only able to achieve a rough approximation, the values obtained for the weighted sound output measurements do not exactly match those of the human ear.

Weighting levels are indicated by the corresponding letter of the frequency weighting, e.g. a C weighting sound output level is given in dB (C). In the field of technical acoustics the A weighting level is predominately employed. For this reason WERMA specifies levels in dB (A).

The sound output level is always dependent on the distance from the source of the sound. WERMA specifications are always based on a measuring distance of 1 m, unless otherwise stated.

In the case of point sound sources (generally applies for all sources radiating equally in all directions), the sound output level decreases by **6 dB** with each doubling of the distance from the source.

Acoustics in Signalling technology

Environmental factors

In addition to the sound output level, the tone frequency and the distance to the signal device, environmental factors are also decisive for the quality of the signal. Wind, humidity or even rain all have an effect on audibility. A very important factor is the ambient noise level.

In industrial environments in particular, the ambient noise level produced by machines is often very high. Accordingly, the signal devices must produce a sufficiently high sound output in order to be heard.

WERMA has developed loud signal horns and sirens for this purpose. With fluctuating ambient noise levels, the use of a siren with a self-adjusting sound level is recommended - a patented invention from WERMA.

Table of working range

		Distance in m											
		1	2	3	5	10	20	30	50	100	200	300	500
Sound pressure level dB (A)	120	114	110	106	100	94	90	86	80	74	70	66	60

Signalisation Index

The signalisation index provides an easy opportunity to select the correct WERMA product. Derived from the test measurements of the respective products and the subjective signal perception, this index quickly leads you to the appropriate product. In this way you can very easily find the optimal product for your individual application.

Why does WERMA incorporate the subjective signal perception into the signalisation index? ...

... because physical parameters alone are only conditionally comparable with regard to signal effect. The measured values take the perceptive faculty of the ear into account, but the psychological effect of various tones and frequencies is not reflected as it cannot be detected by the measuring equipment. This is why WERMA has introduced the signalisation index.

The audibility of an audible signal is dependent on a number of different factors:

- ✓ the sound output of the signal (in dB)
- ✓ the tone frequency (in Hz)
- ✓ the distance between signal device and recipient
- ✓ the noise level of the surrounding area
- ✓ other influences (for example air humidity, wind direction)

Examples of noise in everyday life

Tone frequency

Sound is a series of fluctuations in the air pressure at different amplitudes occurring at a specific rate per unit of time. This rate is termed frequency and is measured in the unit $1/s = 1\text{ Hz}$ (Hertz). It is named after the German physicist Heinrich Rudolf Hertz. A tone is generated by an oscillation at a certain frequency. The musical tone A for example, has a frequency of 440 Hz. Noise is the term used to describe a number of overlapping tones.

The human ear is only capable of hearing tones within a certain frequency range. In the case of children this range is between 20 and 20,000 Hz. This sensitivity declines with increasing age: by the age of 50 the limit is approximately 12,000 Hz, and with advanced age this is often as low as 5,000 Hz.

The human ear hears tones of different frequencies at different relative strengths. The limit of audibility and the pain threshold are therefore dependent on the respective frequency. For this reason audible signal devices generally operate at a frequency between 500 and 3,000 Hz.

Signal Towers

Overview Signal Towers

Whether they are used on machinery and equipment, manual workstations or for access control and point-of-sale systems, WERMA signal towers reliably signal different statuses, such as faults or material replenishment requests. Professional signalling provides your application with greater safety and security and considerably reduces response times. The urgency of the signal can be easily increased using different signal elements. This enables employees to immediately react to faults and quickly resolve any problems that arise.

Monitor your processes, make them reliable and keep them running - saving time and money.

We call this intelligent signalling technology.

Modular Signal Towers

Optical and audible signal elements can be combined flexibly in the modular signal towers. The modular design also enables customers to add other elements separately when required. The mechanical and electrical connection of the signal tower elements takes mere seconds thanks to the bayonet fitting.

Completely pre-assembled Signal Towers

Completely pre-assembled WERMA Signal Towers can be ordered as a compact unit with a single part number, which reduces ordering and installation effort. Impressive features include their stylish design and diverse installation options, allowing them to be used in a wide range of areas.

KombiSIGN 40 - Modular Signal Tower

Size comparison KombiSIGN 40/72

Signalisation Index

Optical		Audible	
LED Permanent Light	2	Continuous tone	3
LED Blinking Light	4	Pulse tone	4
LED Flashing Light	5	Multi tone	5
LED EVS Light	5		

Your benefits

There is no need to compromise with the KombiSIGN 40, because WERMA has combined quick installation, excellent visibility and the highest level of flexibility in this product. This saves time and money with regard to installation and order logistics.

- Save up to 50% on installation time thanks to self-explanatory connections and intuitive mechanics
- Maximum flexibility despite a small number of variants
- TwinLIGHT and TwinFLASH combine two easily selectable light effects in one element
- In ClassicLOOK or DesignLOOK to suit all machine surfaces
- Clearly visible from all positions thanks to the OmniVIEW lens with no blind spots
- Completely pre-assembled standard versions are available (common configurations as a complete tower with a single part number)

Typical applications

Fault signalling

- on machinery and equipment
- on automated systems
- in assembly plants, for example, in the automotive industry

Installation options

- Base mounting
- Tube mounting
- Single-hole mounting
- Additional Installation options using accessories

Features

- Multicolour element offers up to seven colours in a single element
- High IP66 protection rating prevents ingress of dust and water
- Compact and high-output 95 dB siren
- Optionally available with IO-Link technology

TwinLIGHT

TwinFLASH

How to assemble your KombiSIGN 40 signal tower

ClassicLOOK

► STEP 1

Select the required optical or audible elements.

Order numbers can be found on page 29.

Audible Signal Element

- 8 tone siren
- 2 tone siren

Optical Signal Elements

- TwinLIGHT
- TwinFLASH
- LED Permanent light element multicolour

► STEP 2

Select the terminal element and appropriate mounting solution for your application.

► STEP 3

Optional:

Where appropriate, select the bracket.

Can be installed between the terminal element and the mounting adapter.

► STEP 4

Select tube extensions as required.

► STEP 5

Where appropriate, select the bracket and the contact box.

DesignLOOK

Further accessories can be found in our main catalogue or at www.werma.com.

KombiSIGN 40 - Modular Signal Tower

Your benefits

There is no need to compromise with the KombiSIGN 72, because this product combines quick installation, excellent visibility and the highest level of flexibility. This saves time and money with regard to installation and order logistics.

- Smooth surfaces prevent dirt gathering and make cleaning easy
- Easy, intuitive installation - incorrect assembly is practically impossible (Poka Yoke)
- High-tech: the Signal Towers can easily be retrofitted with SmartMONITOR (smart MDE alternative) or AndonSPEED (call for action system)
- TwinLIGHT and TwinFLASH combine two easily selectable light effects in one element
- In ClassicLOOK or DesignLOOK to suit all machine surfaces
- Clearly visible from all positions thanks to the OmniVIEW lens with no blind spots
- Completely pre-assembled standard versions are available (common configurations as a complete tower with a single part number)

Typical applications

The new definition of the industry standard to signal faults

- on machinery and equipment
- on automated systems
- in assembly plants, for example, in the automotive industry
- on conveyor belts in production and logistics
- at manual workstations as a call for action system
- upgradeable to the wireless-based MDE alternative SmartMONITOR or to the call for action system AndonSPEED in logistics applications

Installation options

- Base mounting
- Tube mounting
- Additional installation options using accessories

Features

- Combine the KombiSIGN 72 light elements with special controller solutions such as USB or ASi, or integrate one of the versatile audible elements
- Can be combined and retrofitted with all the KombiSIGN 71 elements and accessories, as well as the SmartMONITOR and AndonSPEED wireless-based systems
- High-output 105 dB siren

LED EVS Light	6				
Xenon Flash	5				

Your benefits

The KombiSIGN 71 has successfully established itself as the standard in industrial applications over recent years. The patented bayonet mechanism enables elements to be installed or removed in a matter of seconds.

- A wide range of accessories ensures maximum flexibility
- High-tech: The Signal Towers can easily be retrofitted with SmartMONITOR (intelligent MDE alternative) or AndonSPEED (call for action system)
- Completely pre-assembled standard versions are available (common configurations as a complete tower with a single part number)

Typical applications

Signalling fault messages

- on machinery and equipment
- on automated systems
- in assembly plants, for example, in the automotive industry
- in the building services industry

Installation options

- Base mounting
- Tube mounting
- Additional installation options using accessories

Features

- Different light effects are possible for individual signalling
- The Multicolour element offers up to seven colours in a single element
- The self-adjusting siren element automatically adapts to the ambient noise level
- Vocal element for your own mp3 or wav files
- Combine the KombiSIGN 71 light elements with special controller solutions such as USB or ASi, or integrate one of the versatile audible elements

How to assemble your KombiSIGN 71 signal tower

► STEP 1

Select the required optical or audible elements in the correct voltage (for details see page 41).

	<p>Audible Signal Elements</p> <ul style="list-style-type: none"> • Buzzer element • Siren element • Vocal element <p>Optical Signal Elements</p> <ul style="list-style-type: none"> • (LED) Permanent light • LED Permanent light ultrabright • (LED) Flashing light • LED EVS element • LED Blinking light • LED Rotating light • LED Permanent light element multicolour

Buzzer element

Siren element

TECHNICAL SPECIFICATIONS/ORDER SPECIFICATIONS:

Dimensions (Ø x Height):	See below		
Lens:	PC		
Protection rating:	IP 65		
Life duration:	5,000 hrs		

Buzzer element			
Dimensions (Ø x Height):	70 mm x 72 mm		
Sound output:	85 dB (A)		
Number/Tone type:	Continuous or pulse tone		
Voltage:	24 V AC/DC	115 V AC	230 V AC
Current consumption:	< 35 mA	< 25 mA	< 25 mA
Order no.:	645 800 75	645 800 77	645 800 68

Siren element			
Dimensions (Ø x Height):	70 mm x 54 mm		
Sound output:	95-105 dB (A), adjustable by slide switch		
Number/Tone type:	Continuous tone, alternating tone, selectable by slide switch		
Voltage:	24 V AC/DC		
Current consumption:	< 40 mA		
Order no.:	645 870 75		

Multi-functional Siren			
Dimensions (Ø x Height):	70 mm x 72 mm		
Sound output:	100 dB (A), adjustable sound output		
Number/Tone type:	8 tones adjustable		
Voltage:	24 V AC/DC	115 V AC	230 V AC
Current consumption:	< 80 mA	< 40 mA	< 40 mA
Order no.:	645 820 75	645 820 67	645 820 68

Multi-functional Siren, with external control			
Dimensions (Ø x Height):	70 mm x 72 mm		
Sound output:	100 dB (A), adjustable sound output		
Number/Tone type:	Number of tones dependent on the number of optical elements		
Tone triggering:	7 diff. tones can be triggered externally		
Voltage:	24 V DC		
Current consumption:	< 80 mA		
Order no.:	645 850 55

KombiSIGN 71 - Audible Elements

High output vocal element with up to 102 dB

i ORDER SPECIFICATIONS AUDIBLE ELEMENTS:

Dimensions (Ø x Height):	See below	
Lens:	PC	
Protection rating:	IP 65	
Life duration:	5,000 hrs	
Siren element with self-adjusting sound output		
Dimensions (Ø x Height):	70 mm x 111 mm	
Voltage:	24 V DC	
Current consumption:	< 150 mA	
Order no.:	645 810 55	
Tone type:	Pulse tone	
Tone frequency:	2.5 KHz	
Sound output:	80 dB (A) - max. 100 dB (A)	
Vocal element		
	88 dB (A)	102 dB (A)
Dimensions (Ø x Height):	70 mm x 111 mm	125 mm x 118 mm
Voltage:	24 V DC	24 V DC
Current consumption:	< 400 mA	< 400 mA
Order no.:	645 840 55	645 860 55
Number of tiers:	Max. 4 additional signal elements possible	
Sound output:	Adjustable, up to 88 dB (A)	Adjustable, up to 102 dB
File Transfer:	Via USB connection and provided software	
Possible data format:	Mp3 and wav files	
Number of sequences:	15 files can be remotely triggered depending on the number of signal elements used or one sequence with max. 50 files.	
Suitable for:	Windows®, System requirements – see Handbook	
Assembly:	Vocal element, USB connection cable and software	
Further Information:	No UL approval

KombiSIGN 71 - USB Terminal Element

Direct triggering of the signal tower elements via USB Interface

TECHNICAL SPECIFICATIONS/ORDER SPECIFICATIONS:

Terminal element with USB Interface

Dimensions (Ø x Height):	70 mm x 36 mm
Fixing:	Tube mounting
Connection:	Via USB
Voltage:	Terminal element: Via USB (5 V DC)
Voltage:	24 V DC
Current carrying cap. Σ I _{max} :	90 mA at 24 V
Order no.:	640 840 00
Assembly:	Assembly includes installation software, drivers, handbook and USB connection cable (length 1.8 m)
Suitable for:	Windows®, System requirements – see Handbook

- Direct triggering of signal tower elements via USB Interface
- Actuation via DLL (Dynamic Link Library) or VCP (Virtual-COM-Port)
- Simple integration into any customer-specific software
- No additional power supply or hardware necessary
- Up to five signal towers with a maximum of five tiers each can be connected

KOMPAKT 37 - pre-assembled Signal Tower

Size comparison KOMPAKT 37 / KombiSIGN 40

Signalisation Index

Optical		Audible	
LED Permanent Light	3	Pulse tone	4

Your benefits

The KOMPAKT 37 is a completely pre-assembled signal tower that can be easily ordered under a single part number. With 1-5 visual tiers, the slim signal tower can be installed quickly and easily. The compact and completely enclosed construction is ideal for use in all types of public areas because it is tamper-proof.

- Up to six levels of signal escalation possible – including an audible signal
- In *ClassicLOOK* or *DesignLOOK* to suit all machine surfaces
- Clearly visible from all positions thanks to the *OmniVIEW* lens with no blind spots

Typical applications

Fault signalling

- on smaller machines and equipment
- on point-of-sale and access control systems

Installation options

- Single-hole mounting
- Additional installation options using accessories

Features

- Pre-assembled with easy cable connection or M12 plug for plug & play use

How to select your KOMPAKT 37 signal tower

► STEP 1

Select the signal tower of your choice with or without buzzer, with the appropriate connection, housing colour, voltage and number of tiers.

Part numbers can be found on page 50.

ClassicLOOK

- 1-5 tiers
- With or without buzzer
- M12 plug or cable
- Black or silver finish

DesignLOOK

► STEP 2

Select up to two extension tubes.

optional:

Extension tube
Order no. **960 698 02**

optional:

Extension tube
Order no. **960 698 04**

► STEP 3

Select the appropriate fixing accessories for your application, using for example a tube and base or a bracket mount.

Single Hole Mounting

Bracket Mounting

Base Mounting

Single Hole Mounting

Bracket Mounting

Base Mounting

Bracket for base mounting
Order no. **960 630 02**

Base with integrated tube
Order no. **960 698 01**

Bracket for base mounting
Order no. **960 630 06**

Base with integrated tube
Order no. **960 698 03**

► STEP 4

Where appropriate, select the bracket and the contact box.

Bracket for base mounting with concealed cable entry
Order no. **960 000 14**

Contact box for cable exit at side
Order no. **975 840 01**

Bracket for tube mounting
Order no. **960 000 01**

Contact box with magnetic base and cable exit at side
Order no. **975 840 04**

Corner fixing bracket
Order no. **960 000 41**

Go to the signal devices page on: www.werma.com

Here you can use the selection tool „Configurator“ to select the Kompakt 37 signal tower according to your requirements.

With the help of intuitive questions and pictures you will be able to make your choice with just a few mouse clicks.

KOMPAKT 37 - pre-assembled Signal Tower

ClassicLOOK

deSIGN 42 - pre-assembled Signal Tower

Size comparison deSIGN 42 / KombiSIGN 72

Signalisation Index

Optical	
LED Permanent Light	3

Your benefits

Thanks to its high-quality stainless steel housing, the deSIGN 42 signal tower is an ideal accompaniment to modern, design-oriented assembly lines, production facilities and machinery. The robust housing provides the key benefit of being tamper-proof for installations in public areas.

- Elegant industrial design
- Tamper-proof for public areas

Typical applications

Fault signalling

- on machinery and equipment

Access control

- on control points in public areas

Installation options

- Single-hole mounting
- Bracket mounting using accessories

Features

- High-quality, robust stainless-steel housing
- Award-winning design

Size comparison ClearSIGN / KombiSIGN 72

Signalisation Index

Optical		Audible	
LED Permanent Light	3	Continuous tone	3
LED Blinking Light	3		
LED Flashing Light	4		
LED EVS Light	4		

Your benefits

The pre-assembled ClearSIGN signal tower combines an appealing industrial design with the latest cutting-edge LED technology and an innovative interface. The version with IO-Link interface offers maximum flexibility and various light effects. The signal tower is ideally suited to modern industrial environments.

- Maximum range of colours using RGB Technology
- Visual display of fill levels and temperature conditions
- Set colours and light effects according to your needs with the IO-Link version

Typical applications

Fault signalling

- on machines and equipment (with optional IO-Link interface)
- on small equipment in production areas or the building services industry

Installation options

- Base mounting
- Bracket mounting using accessories

Features

- IO-Link control enables more than 1 million colours and various light effects
- Available with 3 or 4 tiers

CleanSIGN - pre-assembled Signal Tower

Size comparison CleanSIGN / KombiSIGN 72

Signalisation Index

Optical		Audible	
LED Permanent Light	3	Continuous tone	3
LED Blinking Light	3		
LED EVS Light	5		

Your benefits

The CleanSIGN signal tower has been specifically developed and certified for use in clean rooms, food and hygiene areas as well as the pharmaceutical industry. The signal tower ensures maximum safety in these environments by reducing the risk of contamination.

- Reliable signalling even in clean rooms
- Easy-to-clean, hygienic design for optimal cleaning and disinfection
- Ensures food safety through the absence of uneven surfaces, elevated or countersunk elements where dirt can accumulate
- Use of food safe materials and resistant to cleaning agents (FDA approved)
- Application-specific selection of colours and light effects for maximum flexibility

Typical applications

Fault signalling

- in clean rooms, e.g. semiconductor and solar industries
- in the food and beverage industry
- in pharmaceutical and cosmetic industries

Installation options

- Base mounting
- Ceiling mounting
- Wall mounting

Features

- EHEDG and Fraunhofer IPA approval
- Bracket mounting fulfills Air Cleanliness Class 1 for Cleanroom applications in accordance with DIN EN ISO 14644-1
- Base or Ceiling mounting fulfills Air Cleanliness Class 1
- Electronic modularity of the individual tiers (colour and light effects individually adjustable/ can be externally triggered)

Fixed, three tier colour distribution
in red, yellow and green

The "EVS" light effect ensures
a maximum attention-grabbing
effect (can be set with complete
illumination)

i TECHNICAL SPECIFICATIONS/ORDER SPECIFICATIONS:

	Wall mounting	Base/Ceiling mounting
Dimensions (L x H x W):	112 mm x 485 mm x 125 mm	112 mm x 391 mm x 125 mm
Housing:	PA, black	
Lens:	PA, transparent	
Fixing:	Wall mounting, integrated mounting bracket Base mounting, Ceiling mounting	
Sound output:	85 dB (A)	
CleanSIGN red/green/yellow		
Connection:	Cable, 2 m long, included in the assembly	
Colours:	Pre-set colours: red/yellow/green	
Voltage:	24 V DC	
Current consumption:	Optical: < 120 mA per tier Buzzer: < 20 mA	
Order no.:	695 300 55	695 310 55
CleanSIGN RGY		
Connection:	Screw terminal max. 1.5 mm ²	
Colours:	Coulours selectable by dip-switch: red/yellow/green

FlatSIGN - pre-assembled Signal Tower

Size comparison FlatSIGN / KombiSIGN 72

Signalisation Index

Optical		Audible	
LED Permanent Light	2	Continuous tone	2
LED Blinking Light	3	Multi-tone Sounder	4

Your benefits

The curved front of the FlatSIGN signal tower housing enables it to blend in uniformly with machine and building service applications. The 160-degree visibility angle ensures exceptional visibility even from the side.

- Easy to install – also on flush-mount enclosures
- TwinLIGHT combines two easily selectable light effects

Typical applications

Fault signalling or Access control

- in building service applications (e.g. server and equipment rooms)
- at access points in public areas

Installation options

- Wall mounting
- Additional installation options using accessories

Features

- Permanent or blinking light selectable
- Available with transparent housing or in metal design
- Optional integrated audible signal

TwinLIGHT

In its inactive state, the signal tower blends into the background thanks to its colourless, translucent housing

FlatSIGN in metallic finish

The fixing kit consists of two tube clamps and an adaptor (accessory)

i TECHNICAL SPECIFICATIONS/ORDER SPECIFICATIONS:

Dimensions (L x H x W):	195 mm x 105 mm x 48,2 mm	
Lower part:	PC-ABS, black	
Upper part:	PC, transparent or silver	
Fixing:	Wall mounting	
Cable entry:	Cable diameter max. 11 mm	
Connection:	Screw terminal max. 1.5 mm ²	
Light effects:	Permanent or blinking light selectable	
Audible signal:	Buzzer or multi-tone sounder (8 tones)	
Sound output:	Max. 80 dB (A)	
Colours:	Green, yellow, red	

	Multi-tone Sounder	Buzzer (Continuous tone)
Voltage:	24 V DC	115-230 V AC
Current consumption:	Optical: 30 mA per tier Audible: 30 mA	

FlatSIGN with transparent housing

VarioSIGN - pre-assembled Signal Tower

Size comparison VarioSIGN/KombiSIGN 72

Signalisation Index

Optical		Audible	
LED Permanent Light	3	Continuous tone	3
LED Blinking Light	3		
LED EVS Light	5		

Your benefits

With the VarioSIGN light effects and colours can be individually set and adjusted via dip-switches at any time - depending on the variant. The eye-catching illumination of the entire lighting body ensures an exceptional appearance and visibility.

- Flexible selection of colours and light effects
- Award-winning design

Typical applications

Fault signalling

- on machinery and equipment
- on automation systems

Installation options

- Base mounting

Features

- Optional integrated sounder
- Electronic modularity: i.e. colours and light effects are adjustable for each tier

Fixed, three-tier colour distribution in red, yellow and green

The "EVS" light effect ensures a maximum attention-grabbing effect (single colour distribution can be selected)

Ex LED Signal Tower - pre-assembled Signal Tower

Size comparison Ex signal tower / KombiSIGN 72

Signalisation Index

Optical		Audible	
LED Permanent Light	3	Pulse tone	4

Your benefits

The Ex Signal Tower is designed for use in explosive gas and vapour atmospheres (zones 1 and 2). No additional zener barrier is required.

- Light and compact Ex signal tower
- Many years of proven use in Ex-applications

Typical applications

Fault signalling

- in the processing and storage of highly flammable substances

Installation options

- Wall mounting

Features

- Combination of encapsulation "m" and intrinsic safety "ib" with connection area "e"
- For Gas applications: Zones 1 and 2

i TECHNICAL SPECIFICATIONS/ORDER SPECIFICATIONS:

Systems for optimising production and logistics areas

Systems for optimising production and logistics areas

Why network signal towers?

To discover hidden optimisation potential in your manufacturing, logistics or shipping processes, you need a system that measures unproductive time - whether it be at manual workstations, packing stations or in automated production areas.

Networked WERMA signal towers offer specific benefits in this regard. By using the signal tower as an interface, you are not dependent on other systems and it is easy to retrofit the system - either on workstations or in entire plants. Our wireless WIN solution (Wireless Information Network) makes time-consuming cabling effort obsolete. It allows you to collect reliable data, immediately identify weak points and optimise your processes based on these findings, thus increasing productivity. The stand-alone software displays the status of all integrated workstations or machines centrally in the control station module, provides information via the email notification function, documents faults and generates easy-to-read reports.

SmartMONITOR - The smart MDE alternative for manufacturing companies

SmartMONITOR (see page 82) is the smart MDE alternative for industrial companies looking for a way to quickly and easily gather reliable data to optimise their manufacturing processes. SmartMONITOR provides all of the relevant data for machines, systems and manual workstations easily at the touch of a button. Unlike conventional, complex MDE systems, SmartMONITOR is a simple, wireless-based retrofit solution for signalling and analysing your entire production facility - at a glance.

AndonSPEED - The solution for packaging and shipping workstations

Would you like to reduce costs in your shipping processes? AndonSPEED (see page 84) is the ideal call-for-action system, because it makes permanent time-savings possible. In contrast to conventional Andon tools, AndonSPEED not only signals faults but it also documents and analyses unproductive downtime. This enables you to reduce wait times by up to 50% - for more "units per hour".

AndonLIGHT - Manual Call for Action System without Networking

Do you simply need a manual call for action system for a small designated area - and local, clear signalling is sufficient? If so, then AndonLIGHT (see page 92) is the ideal introduction to our professional call for action systems. And it is easy to network these products at a later date.

KombiSIGN reflect - Simple "Reflection" of Signal Towers

The simple KombiSIGN reflect solution wirelessly "reflects" machine statuses to a WERMA Signal Tower within your line of sight. This allows you to keep track of machines not in your direct vicinity.

Your benefits

SmartMONITOR is the smart MDE alternative for industrial companies looking for a way to quickly and easily gather reliable data to optimise manufacturing processes. Intelligent networking of signal towers creates a simple, low-cost retrofit alternative to conventional, complex MDE systems.

- Identifies and documents faults and unproductive time more quickly
- Reduces response times and prevents downtime
- Works regardless of the manufacturer, age or function of the machine
- Provides all relevant data of machines, systems and manual workstations at a glance
- Reports show opportunities for process and productivity improvements
- Modular and expandable with no cabling required

Typical applications

- Discover hidden optimisation potential
- Signal a production stoppage
- Manage the supply of material to machines and workstations
- As a control station for manufacturing companies
- Production reporting

Initial startup

- Install software
- Connect and configure receiver on the computer
- Connect and configure transmitter on the computer
- Integrate transmitter into signal tower (no tools necessary)

Features

- Robust and proven wireless network for manufacturing environments
- Licence-free software is included
- Integrated analytics and reporting tools
- WIN slave control enables you to trigger simple logical rules for example to activate an additional signal tower as a head-of-line function

Free test kit

Discover the optimisation potential in your company. Order your free test box today. It contains everything you need for one machine, including a full version of the software.

www.werma.com/systeme

This is how you put together your SmartMONITOR system

Your benefits

AndonSPEED optimises your processes at packaging and shipping stations - because AndonSPEED provides a visual notification of where problems have arisen. Permanent time savings are possible because of quick fault repairs. The wireless network sends signals the workstation or the central control station and can send an email notification if required.

- Rapid assistance reduces wait times
- Reduces response times and prevents shutdowns
- Quick fault repair for more "units per hour"
- Intelligent reporting for lasting improvements
- Optimisation potential is made transparent

Typical applications

- Report stoppages on chutes or conveyor belts
- Manage the supply of materials to packaging stations
- Report missing items at the shipping station
- Process improvement in shipping areas

Initial startup

- Install software
- Connect and configure receiver on the computer
- Connect and configure transmitter on the computer
- Integrate signal transmitter into signal tower (no tools necessary)
- Connect Andon SmartBOX

Features

- Robust, proven wireless network for production environments
- Licence-free software is included
- Integrated analytics and reporting tools
- Ability to implement a head-of-line function, for example, with slave control

Free test kit

Discover the optimisation potential in your company. Order your free test box today. It contains everything you need for one workstation, including a full version of the software.

Software modules and functions

WIN is the stand-alone software for our wireless networked SmartMONITOR and AndonSPEED solutions and stands for "Wireless Information Network". **It is included in the product assembly.**

Technical Details

Suitable for:	Windows®. System requirements – see Handbook
Language:	German, English, French, Chinese and Polish
Included in the delivery with the items:	860 000 00, 860 000 01, 860 000 06, 860 000 07

Overview of the software modules and functions:

React quickly with the Control Station

You can quickly see if a machine is in an error condition or running normally. This module helps you to quickly take action to reduce downtime.

The messaging function keeps you in touch at all times

It is no problem for WIN to keep you informed anytime anywhere about condition changes. For example a condition change can trigger an email to be sent automatically to a PC or smart phone. You can select for which machines and which condition changes an email is generated and also set a time delay before the email is sent.

Include a range of users with the Multiple Operator Access

The software uses a structure based on a database and can be used by any number of users. The database needs to be copied over to a shared drive on your network to allow multiple users access to the system.

Increase efficiency with the Productivity Module

Using the Productivity Module you can check the productivity of your machines and workstations over any time period. You can look for example at the last working day, or define specific time periods such as shift patterns.

Production transparency in the Runtime module

The run-time module provides an overview of the operating time and downtime of the stations monitored. You can use the module to lower your error rates, because the duration and number of faults is consistently recorded.

Compare different workstations or machines to gain insight into optimising your processes.

Description	Status	Fulfillment level
Part 21	Completed	100%
Part 28	Completed	100%
Part 43	Completed	100%
Part 500	Completed	100%
Moulding part P20123	Completed	100%
Tool 556	Running	39%
Tool 25	Running	39%
Part 677	Waiting	0%
Part 322	Waiting	0%
Part 456	Waiting	0%

Overview of jobs being run

The module gives you a comprehensive overview of which job is running on which machine and how the job is progressing.

Simple reporting with the Report and Export Function

The user friendly report creation function allows you to convert all data into individual reports in tabular or graphic form. The report is created and displayed for printing and can be individually amended and saved in various formats (pdf, HTML, Excel, CSV, jpg).

Stability of the Network with the Routing Module

All transmitters automatically form a network. The Routing Module assists in setting up or adjusting the best network for WIN.

The route network graphic shows the current set up of the WIN network and the signal strength of each "WIN slave/transmitter" or WIN slave performance/transmitter performance" and mainly serves diagnostic purposes.

Control and switch with the "Control" Module

Define simple logic rules in the "control" module to link the statuses of all connected signal towers and transmit them on to the "WIN slave control" hardware.

This allows you to implement a head-of-line function, for example, or to switch devices on and off.

Your benefits

The introduction to professional call for action systems: the easy-to-retrofit Andon products in combination with WERMA KombiSIGN 71 and KombiSIGN 72 signal towers. With these products it is easy to improve safety and efficiency in the workplace.

- Rapid assistance reduces wait times
- Reduces response times and prevents shutdowns
- Intuitive and self-explanatory light system
- More reliability and efficiency (no running about, calling out, etc.)
- It can be expanded to a networked system at any time

Typical applications

- Professionally signal problems at workstations
- Manage supply of materials to workstations
- Optimise processes

Initial startup

- Simply connect AndonLIGHT with mains plug

Features

- Enables up to eight different statuses to be activated
- Signal directly on the signal tower with AndonCONTROL
- Activate signals on the signal tower with Andon SmartBOX

This is how you put together your AndonLIGHT system

AndonLIGHT - Pre-assembled Signal Tower

Or select one of our pre-configured variants.

KombiSIGN reflect for KombiSIGN 72 and 71

Your benefits

Do you have a machine or a workstation that is out of your line of sight? KombiSIGN reflect offers a simple solution that "reflects" the machine status to a KombiSIGN signal tower in your vicinity. The two elements are paired and ready for immediate use.

- Keep track of machines that are out of view
- Reduce response times and prevent shutdowns
- Repair faults quickly
- Monitor machines/areas that are not yet networked

Typical applications

- Report stoppages in complex production areas
- Manage the supply of materials where visibility is restricted
- Improve processes in complex production areas

Initial startup

- Integrate transmitter and receiver into the signal towers (no tools necessary)

Features

- Pre-configured for plug & play
- Simple reflection of machine statuses
- Large transmission range thanks to robust wireless network for production environments

The slave sends the status directly to the master, and reflects the status of the signal tower installed on the machine

i TECHNICAL SPECIFICATIONS/ORDER SPECIFICATIONS:

	Slave	Master
Dimensions (Ø x Height):	70 mm x 65,5 mm	70 mm x 65,5 mm (without antenna)
Housing:	Polycarbonat, black	
Connection:	Bayonet	
Wireless connection ISM frequency:	868 MHz (conforms to the EU's EN 300220 harmonised standard and can thus be used in all EU member countries) Further countries upon request	
Transmission range:	Up to 300 m (unobstructed line of sight)	
Operating voltage:	24 V AC/DC	24 V DC
Current consumption:	40 mA	40-900 mA
Order no.:	861 640 01	

Please check the wireless frequency. In Europe the version with 868 MHz is used. Please enquire about use in other countries.

Signal Beacons & Traffic Lights

Overview Signal Beacons & Traffic Lights

WERMA's beacons and traffic lights help you indicate risks and imminent danger promptly and clearly. The urgency of the required action can be indicated by the colour of the light and by the type and duration of the signal.

This allows you to make your processes safe and efficient. Simply safe. Simply better. This is what we call intelligent signal technology.

Installation beacons

Installation beacons are used for installing in M20/M22 drilled holes. The beacon is fixed from the back, in control panels for example, using a locking nut. This prevents subsequent tampering.

Surface mounted beacons

Surface mounted beacons are fixed directly onto the surface of the relevant object (machines). The basic mounting options are base, bracket or tube installation.

Micro Installation Beacons - 230/231/232

Size comparison Micro/Mini

Signalisation index

Optical	
LED Permanent Light	2
Xenon Flashing Light	4

Your benefits

Despite their size, micro installation beacons from the 230 / 231 / 232 range will provide good all-round visibility. The range includes control panel indicator lights.

- The industry standard for control panels
- Easy to install, even where space is restricted

Typical applications

Signalling faults and statuses

- On small machines and equipment
- In building technology

Installation options

- M22 single-hole mounting including nut
- M20 for direct installation, in safety switches, for example

Features

- Available with a permanent light
- Powerful xenon flash light for increased visibility

Mainly sideways illumination

The LED Installation Beacon 230 can for example be used in applications with cable-operated switches or limit switch devices

Mini Installation Beacons - 239

Size comparison Mini 239/Mini

Signalisation index

Signalisation index	
Optical	
LED Permanent Light (multicolour)	3

Your benefits

WERMA's 239 mini installation beacon is perfect for use on machinery, and control panels. The colours can be set quite simply by means of binary inputs.

- Up to five different colours with just one light
- Low lens, where space is restricted
- Raised lens for best visibility also from the side

Typical applications

Signalling faults and statuses

- On control consoles of machinery
- In machine housings
- On control panels

Installation options

- M22 single-hole mounting

Features

- Bit-encoded actuation allows the three basic colours green, yellow and red to be displayed using just two PLC outputs. With a third output, white and blue can also be activated.
- With Spec. V 3.0, the special AS interface version is suitable for addressing (A/B mode) up to 62 modules – without an external power supply

LED Permanent Light 2xx + 8xx	3
LED Blinking Light 8xx	3
LED Rotating Light 8xx	4
Permanent Light 2xx + 8xx	2
Xenon Flashing Light 2xx + 8xx	4

Your benefits

The Mini Signal Beacons are used wherever space is restricted.

The beacons are easy to install and connect, even in tight spaces, thanks to convenient connection terminals and easily accessible mounting holes.

- Reliable signalling at close quarters
- Available as a permanent light or as a bright Xenon flash light to attract attention

The 8xx range:

- Robust and tamper-proof

Typical applications

Signalling of faults

- On small machines and equipment
- In building technology

Installation options

- Base mounting
- M22/PG29 single-hole mounting
- Bracket mounting
- Tube mounting

Features

- High protection rating IP65 for both indoor and outdoor use

The 815 / 816 / 817 family:

- Robust and shock-resistant up to 20 joules

816 LED Beacon (Multicolour) with USB Interface - PG29 (Ø 37 mm)

i TECHNICAL SPECIFICATIONS/ORDER SPECIFICATIONS:

Dimensions (Ø x Height):	75 mm x 66 mm (Protrusion from panel)
Housing:	ABS/PC-Blend, black
Lens:	PC, transparent
	Shock resistance 20 Joules according to EN 60079-0
Fixing:	Installation mounting for Ø 37 mm (PG29) Base and wall mounting possible (accessories)
Connection:	Mini USB 2.0 downward cable outlet
Power supply:	Via USB
Colour options:	More than 200,000 colours (RGB LED)
Suitable for:	Windows®, System requirements – see Handbook
Assembly:	LED beacon, demo software, driver and USB connection cable included, 1.8 m long
Life duration:	Up to 50,000 hrs
Voltage:	5 V (USB-Connection)
Current consumption:	≤ 500 mA
clear lens	816 480 53
opaque lens	816 780 53

🏠 ACCESSORIES:

You will find the appropriate accessories for base or tube mounting on page 140 or under www.werma.com

⚠️ ADDITIONAL INFORMATION:

The installation LED Beacon with USB interface is compatible with USB 2.0 and 1.1.

A wide range of colours and light effects can be quickly and simply programmed by the customer and altered at any time.

Your benefits

The Midi Beacons provide flexible signalling over medium distances. The high protection rating IP65 ensures the safe operation in many areas – both indoor and outdoor applications.

828 xenon flash light:

- Bright 5-joule xenon flash for high visibility, even in direct sunlight or over longer distances

829 LED beacons:

- Versatile lighting effects (permanent / blinking / rotating / flash / EVS) for a wide range of applications
- No moving mechanical parts, therefore unsusceptible to shock and vibration
- Maintenance-free operation and lower running costs due to low current consumption

885 rotating mirror beacon:

- High intensity light thanks to halogen bulb in extremely compact housing
- Easy to connect, without removing the mechanical assembly

Typical applications

Signalling faults or relaying alarms

- in building service industry
- for door and gate systems
- on machinery and plant

Installation options

- Base mounting
- Tube mounting
- Bracket mounting with plastic bracket

Features

- Optional wire guard to protect against mechanical damage

829 LED lights:

- Also available as a particularly attention-grabbing EVS option (flickering light)

885 rotating mirror beacon:

- Quiet belt drive allows the beacon to be mounted and operated in any position, even up side down (with limited IP protection) or at 90° to the wall

Wire guard, galvanised, only for base mounting	975 826 03
Tube Ø 25 mm, all anodized aluminium, 100 mm long	975 845 10
Base for tube, plastic, Ø 25 mm	975 840 90
Base for tube, metal, Ø 25 mm	975 840 91

ADDITIONAL INFORMATION:

829 with external triggering - Light effects set via control cables

Thanks to the external trigger function, the range of light effects offered by the LED Beacon 829 can be set by means of electrically isolated, binary coded 24 V control cables. This guarantees a much greater level of resistance to electrical interference.

The machine operator can use the different signals to indicate various machine conditions - without having to make adjustments to the beacon itself. In addition the LED beacon 829 can be used in conjunction with both positive and negative trigger logic.

Your benefits

WERMA's Maxi Beacons give flexible signalling over larger distances. The IP65 rated units are ideally suited for use in both indoor and outdoor applications.

838 xenon double flash:

- Very bright, even in direct sunlight and over longer distances

280 LED beacons:

- Versatile light effects (permanent / rotating / flash / EVS) for a wide range of applications
- Resistant to shock and vibration
- Maintenance-free operation and low running costs

883/884 rotating mirror beacons:

- High intensity light and robust housing
- Easy to connect, without removing the mechanical assembly

Typical applications

Signalling faults and relaying alarms

- In building technology
- For door and gate systems
- On machinery and plant equipment, over long distances

Installation options

- Base mounting
- Tube mounting
- Bracket mounting

Features

- Tamper-proof and shock-resistant up to 20 joules
- Optional wire guard to protect against mechanical damage

883/884 rotating mirror beacons:

- Quiet, with low-wear wheel and disc drive

884 revolving beacon:

- Special Fresnel lenses produce beams of light that can be seen over longer distances even in poor light conditions

Your benefits

The compact 853 LED beacon is particularly versatile. With an IP67 protection rating, it is suitable for all indoor and outdoor applications, even in harsh environmental conditions.

- Powerful high-output, forward-directed light effect
- Clearly visible, also from the side
- Easy mounting and electrical installation thanks to the elastic, self-sealing, membranes or optional M20 cable gland for mounting on different sides
- Many combinations possible (traffic lights, for example)
- Where space is restricted: Multi-coloured version available, with up to seven colours

153 multi-tone siren:

- Loud audible signal to complement 853 beacon or as a stand-alone product
- Eight signal tones to choose from and a signal escalation option using three different externally triggerable tones

Typical applications

Signalling of faults

- In lift and hoist systems (48 V)
- In building technology

Installation options

- Wall mounting
- Base mounting

Features

- Signal escalation possible with LED permanent light, LED double flash and EVS light in different colours
- Wide range of light effects and voltage options (12V, 24V, 48V and 115-230V)
- With the multi-coloured version, the three basic colours red, yellow and green can be activated with just two PLC outputs. With a third output, a further four colours are available

153 multi-tone siren:

- The sound output can be adjusted remotely

i TECHNICAL SPECIFICATIONS/ORDER SPECIFICATIONS:

Dimensions (L x H x W): 85 mm x 85 mm x 72 mm
Housing: PP-GF, black
Lens: PC, transparent
Connection: Screw terminal 0.5 - 1.5 mm²
 CAGE CLAMP® 0,5 bis 1,5 mm² (Multicolour, RGY)
Fixing: Wall, base and ceiling mounting
Possible colours: Red, yellow, green, white, blue, violet, turquoise (multicolour)
Equipment: Elastic self-sealing membranes for cable entry without tools
 Eight integrated M20 threads, no nuts required
 Optional use of a cable gland, thread length of cable gland ≤ 9 mm (accessory)
Assembly: Incl. snap-on fixing bracket (optional use)
Life duration: Up to 50,000 hrs

Heavy-Duty Beacons - 839

Size comparison Maxi/Heavy Duty

Signalisation index

Optical	
LED Permanent Light	6
LED Rotating Light	7
Flashing Light Xenon	9
Rotating Mirror/Rotating Light	7

Your benefits

The heavy-duty beacons have the advantage of a robust and seawater-resistant aluminium housing unit in conjunction with a shock-resistant wire guard. These products are therefore especially suitable for use in harsh environments, locations exposed to seawater, or situations where excellent shock resistance is required.

- Maintenance-free operation permits use in locations where access is difficult
- Optimum protection, against even severe mechanical strain or exposure to seawater

Typical applications

Signalling faults and relaying alarms

- In outdoor and indoor areas under extreme conditions
- For maritime applications on ships or in harbour areas

Installation options

- Base mounting
- Bracket mounting

Features

- Special screwed cable gland for equalising the pressure in the housing with the environmental pressure
- IP66 / 67 for use in harsh conditions

Rotating Mirror

Obstruction Light

Why do obstacles need to be illuminated?

The law stipulates that buildings of a specific height and in the vicinity of airports as well as factory chimneys, towers, masts etc. must be equipped with obstruction lights.

This special lighting makes obstacles visible for pilots in the dark or when visibility is poor. Obstruction lighting is one of the most important aspects of flight safety.

What directives and regulations are there?

The method of marking obstacles to air traffic is laid down by diverse laws, regulations and recommendations. These regulations have a clearly defined sphere of influence and are **internationally interlinked**.

The International Civil Aviation Organisation (**ICAO**) is a special organisation within the United Nations created to establish and develop universal regulations for safety, continuity and economic efficiency in international air traffic. The recommendations of the ICAO are not directly binding in the member states, but must be transformed by them into the appropriate **national legal regulations**.

In **Germany** the Ministry for Transport and Construction Development (**BMVBS**) issues the regulations covering obstruction lighting on buildings. The **ICAO** regulations regarding the methods of marking and lighting aviation obstacles can be found in ICAO Annex 14.

- **"Low intensity obstacle beacon type A"**: a red permanent night-time warning beacon for fixed obstructions with a brightness of 10 cd.
- **"Low intensity obstacle beacon type B"**: a red permanent night-time warning beacon for fixed obstructions with a brightness of 32 cd.

Where are obstacle lights deployed?

- **Germany**: Marking of aviation obstacles by night at any height providing the highest point of the obstacle can be marked.

- **According to ICAO**: Marking of aviation obstacles by night up to 45 m ("Low-intensity Obstacle Light, Type A"), additionally in combination with "medium-intensity obstacle lights"

LED Obstruction Light Type B

LED Permanent Light 894	6
Permanent Light (bulb) 890	4
Flashing Light Xenon 890	9
Audible	
Multi-tone 190	8
Vocal alarm 190	7
Siren 494	4

Your benefits

Signal lights and traffic lights from the 890/895/897/494 range provide reliable signalling, both as single lights or as combined signalling lights.

Modular traffic lights 890 and multi-tone sounder 190:

- Cost-effective traffic light with 25W incandescent bulb or LED traffic light with clear lenses
- Easy installation in just a few steps and with any combination of 4 lights

Multi-colour variant (RGY):

- Drastic reduction in number of variants by combining three light colours in a single product – Ideal where space is restricted
- Additional high-output audible signalling of up to 110 dB(A) available in combination with multi-tone sounder/vocal alarm 190

Compact LED traffic light 894/traffic light combination 494 for extreme ambient conditions:

- With high IP65/IP69K protection rating for use in extremely harsh conditions
- The 494 range combines a high-output optical signal with a powerful 90dB siren

Typical applications

- Garages and car parks
- Access control in building service systems
- Traffic regulation on construction sites
- Signalling for loading bays
- Car washes/washing areas

Installation options

Modular traffic light 890:

- Direct mounting or bracket mounting of up to 4 lights with fixing bracket

Compact LED traffic light 894/494:

- Wall mounting and tube mounting with additional adapter

Features

190 Vocal Alarm:

- The vocal alarm enables the high-output playback of spoken messages, music and tones provided in mp3 format

LED Permanent Beacon

LED Traffic Light Combination with mounting bracket (accessory)

Clear lenses ensure effective signalling even in direct sunlight

Monitored / Monitorable Beacons for safety applications – 806/826/829 families

Size comparison Mini/Midi/Maxi

Signalisation index

Optical	
LED Permanent Light	4-5
Permanent Light (bulb)	4

Your benefits

For applications where safety is an issue, we recommend WERMA's monitored beacons. These beacons are certified by the TÜV Technical Inspection Agency and can be integrated into the safety assessment of your machinery/plant equipment in accordance with EN 13849-1 and EN 62061.

806 monitorable LED beacons:

- TÜV certified LED light that enables current monitoring
- Approved for muting applications in accordance with IEC 61496-1 and laser applications as per EN 60825-1

829 monitored LED beacons:

- Built-in monitoring electronics with two potential-free outputs; the light thus achieves PL e as per EN 13849-1 and safety category 4
- Approval confirmed by TÜV certificate
- Maintenance-free LED technology

826 monitored beacons:

- Built-in monitoring electronics with two potential-free outputs; the light thus achieves PL e as per EN 13849-1 and safety category 4
- Approval confirmed with a TÜV certificate

Typical applications

Signalling of faults in applications where safety is an issue

- on machinery and plant equipment
- in building service industry

Installation options

- Base mounting
- Bracket mounting with accessories
- Wire guard accessory to protect against mechanical damage

Features

- Further safety-related products are available – or request

Bracket for 1-sided mounting	975 840 85

! ADDITIONAL INFORMATION:

What does Muting mean?

Muting is the temporary automatic overriding of a safety protection device by means of a control system within the normal operating cycle of a machine. This bridging of the safety protection must be visually displayed in order to prevent staff mistakenly entering a dangerous area.

It is therefore necessary that the signal beacon in such applications can be triggered by failsafe technology and the bulb function can be monitored. The standard colour for muting signalisation is clear; yellow is however also permitted.

TECHNICAL DIAGRAM:

yellow	829 370 55
clear	829 470 55

ACCESSORIES:

Bracket **975 826 05**

! ADDITIONAL INFORMATION:

Function
The device is equipped with monitoring electronics which signal the current flow of the beacon back to two electrically isolated, potential-free semiconductor outputs A and B (outputs closed).
If the beacon has not been actuated, both outputs are open. In case of a fault at least one output is opened.

TECHNICAL DIAGRAM:

Fuse for 7 W bulb:	500 mA quick action (IEC 60127-3/3)
Atmospheric humidity:	≤ 95 % without moisture condensation
Response time, normal operation and with filament break:	1 ms bis 5 ms
in fault cases with safety release:	< 300 ms (with short-circuit current ≥ 4 A)
Certification:	EN ISO 13849-1:2008 category 4, Performance Level „e“ EN ISO 13849-2:2008 validation
Bulb included in assembly.	
Voltage:	24 V DC
red	826 110 55
yellow	826 310 55
clear	826 410 55

! ADDITIONAL INFORMATION:

Function

The device is equipped with a lamp monitor which signals the current flow of the incandescent lamp back to two electrically isolated, potential-free semiconductor outputs A and B (outputs closed). If the lamp has not been actuated, both outputs are open. In case of a fault and/or a lamp failure at least one output is opened.

Depending on the safety category, one or two outputs are to be used for a reliable lamp evaluation. In case of an incandescent filament short-circuit in the lamp, the integrated fuse is tripped. It must be replaced by a new fuse in accordance with the specification after the lamp has been replaced by a lamp of equal wattage.

Your benefits

Ex rated beacons from WERMA are designed for use in both gas and dust atmospheres that are potentially explosive.

- Their use in the highest explosion group IIC and IIIC has been tested, which means that they are suitable for all explosion groups in the relevant area
- Easy, customer-friendly connection thanks to "e" connection area
- Various light effects, also with LED technology, for all conceivable application types

Typical applications

Signalling faults and relaying alarms

- in potentially explosive atmospheres resulting from gases and liquids (in the chemical industry, filling lines for flammable liquids, petrochemical industry etc.)
- in potentially explosive atmospheres resulting from dust (in the plastics and metal-work industry, food industry, grain mills and the wood processing industry)

Installation options

- Base mounting
- Bracket mounting (accessory)
- Tube mounting (accessory)

Features

728 / 729 / 785:

- Extended Ex temperature range of -50 °C to 50°C is possible with accessories

728 / 729 / 785:

- Seawater resistant aluminium housing

The maintenance-free LEDs have a life duration of up to 50,000 hours

Additional protection with the robust wire guard (accessory)

Horns & Sirens

Horns & Sirens

Overview Buzzer, Sirens, Horns and Sounders

Audible signals are everywhere!

Audible signals warn, protect and guide us in the modern industrial world. They function where caution, prudence and clarity are imperative, indicate emergencies and demand direct action. They are globally understood, irrespective of language, written or spoken.

Audible signals are deployed where an optical signal is insufficient or inappropriate. The basic signal is provided by one or more tones or a sequence of tones, and is to raise awareness and alert to a specific danger.

Your benefits

WERMA Installation Buzzers and Sounders have been specifically designed for easy installation in control panels.

- Quick and easy installation
- Tamper-proof when installed
- Minimal protrusion from panel installations where space is tight (111)

Typical applications

Signalling faults or status messages

- in switch panels
- in control cabinets

Installation options

- Installation mounting

Features

- Proven piezo technology (except 338, 382)

107, 109, 110, 111

- High IP65 protection rating for outdoor applications
- Easy to connect using a plug-in connection
- Up to 8 tones for signalling different statuses

i TECHNICAL SPECIFICATIONS/ORDER SPECIFICATIONS:

Dimensions (Ø x Height):	28 mm x 12 mm (Protrusion from panel)			
Housing:	PA fibreglass, high-impact			
Tone frequency:	Ca. 2.400 Hz / ca. 3.200 Hz (12 V)

Your benefits

Mini Buzzers and Horns from WERMA provide safety and security by delivering a reliable audible warning when faults occur.

- Quick and easy installation
- Tamper-proof when installed
- Ideal signalling effect in close-range applications

Typical applications

Fault signalling

- in areas with low ambient noise levels
- in control panels and on machine control units
- in building service systems (e.g. gas alarm, lift alarm)

Installation options

- Base mounting
- Wall mounting
- Tube mounting

Features

- Proven piezo technology
- 584/585 series with ten times longer life duration compared with electromechanical versions

Base mounting

The adaptor (accessory) allows quick and simple mounting on a tube

A piece of the rim can be broken out to allow for cable entry from the side

Your benefits

The loud Midi Horns, Sounders and Sirens from WERMA provide safety and security by delivering reliable audible warning when faults occur over longer distances or in noisy environments.

- Quick and easy installation
- Tamper-proof when installed
- Ideal for noisy environments
- Long life duration

Typical applications

Fault signalling

- On machine controllers and on large equipment
- In building service systems (e.g. gas alarm)
- Alarm in the event of overload (e.g. mobile cranes)

Installation options

- Base mounting
- Wall mounting
- Tube mounting

Features

- Proven piezo technology
- 574/575 series with ten times longer life duration compared to electromechanical versions
- Up to 8 tones for signalling different statuses

Base mounting

The adaptor (accessory) allows quick and simple mounting on a tube

Top view: Mounting holes integrated into the product rim allow easy mounting without having to remove the cap

Design Multi-Tone Sounder

Signalisation index	
Audible	
Multi-Tone Sounder	8

Your benefits

WERMA Design Multi-Tone Sounders provide safety and security by providing an audible warning in applications with greater aesthetic requirements. The innovative housing design makes for simple mounting in many diverse applications.

- Ideal signalling effect over great distances
- Many application options with up to 32 tones available
- Up to 3 tones can be externally triggered for the escalation of signals
- Includes standardised tones (including those used in fire alarms)

Typical applications

- Signalling faults or alarms in the event of danger
- in building service systems
- on machinery and equipment

Installation options

- Wall mounting
- Base mounting
- Ceiling mounting

Features

- Up to 32 tones (standardised according to various standards and guidelines)
- Multi-voltage versions allow multiple applications with a single device

Vocal alarm

Signalisation index	
Audible	
Vocal alarm	7

Your benefits

This extremely loud Vocal Alarm provides the ability to play application-specific audio files in order to produce clear and targeted instructions. It is particularly suitable for large assembly facilities and can address defined groups of people (for example, a particular work unit) in a targeted manner.

- Reliable alarm output over long distances or in noisy environments
- Easy to adjust to local conditions
- Excellent audio and sound quality for optimum clarity of signalling
- Completely flexible; select the audio file yourself

Typical applications

Signalling faults or issuing specific instructions

- For areas with high ambient noise levels
- In production and assembly environments

Installation options

- Wall mounting

Features

- Plays customer-specific audio files (sounds, melodies and your own recorded messages)
- 15 files can be played, or a sequence with a maximum of 50 files
- Simple USB data transfer
- Sound output can be externally triggered up to 110 dB

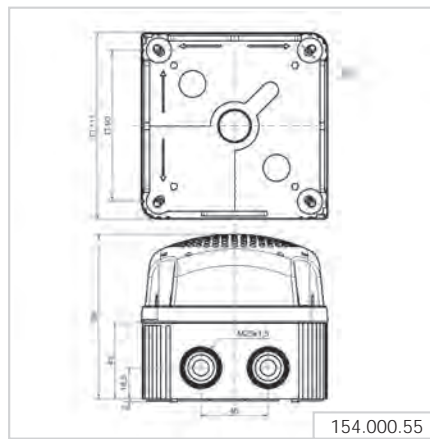

Vocal alarm 154

i TECHNICAL SPECIFICATIONS/ORDER SPECIFICATIONS:

Dimensions (L x H x W):	111 mm x 98 mm x 111 mm
Housing:	PP-GF, PC/ABS Blend
Sound output:	Adjustable, up to 110 dB
File Transfer:	Via USB connection and provided software
Possible data format:	Mp3 and wav files
Number of sequences:	15 files can be remotely triggered or one sequence with max. 50 files
Suitable for:	Windows®, System requirements - see Handbook
Assembly:	Vocal alarm, USB connection cable and software
Voltage:	24 V DC
Current consumption:	< 500 mA Low Power < 1500 mA High Power
Order No.:	154 000 55

Heavy Duty Multi-Tone Sounder

Signalisation index				
Audible	139	141	142	129
Multi-Tone Sounder	6	8	10	8

Your benefits

The robust housings of WERMA Heavy Duty Multi-Tone Sounders are particularly well-suited for use in public areas or in harsh industrial environments. Versions with an aluminium housing and separate certification (German Lloyd) are available for marine applications.

- Ideal in extremely noisy environments and over long distances
- Many application options with up to 42 tones
- Up to 3 tones can be externally triggered for the escalation of signals
- Includes standardised tones (including those used in fire alarms)

Typical applications

Signalling of faults and alarms

- outdoors in extreme conditions
- in larger industrial plants
- in maritime applications

Installation options

- Wall mounting

Features

- High protection rating up to IP67
- Multi-voltage versions allow multiple applications with a single device

Alarm Bell

Signalisation index	
Audible	
Alarm Bell	5

Your benefits

A signalling technology classic: The robust WERMA Alarm Bell for signalling break-time or machine activation warnings.

- Many application possibilities
- Robust housing prevents damage when used in public areas or in harsh industrial environments

Typical applications

As a bell or alarm

- Goods receiving areas
- Entry/exit applications
- Counter service call point, etc.

Installation options

- Wall mounting

Features

- High IP66 protection rating for outdoor use

Ex Horns and Sirens

Signalisation index	
Audible	
Continuous Tone	4
Signal Horn	6
Multi-Tone Sounder	6

Your benefits

Ex Horns and Sirens from WERMA have been developed specifically for use in potentially explosive atmospheres. The Ex signalling devices are designed for use in explosive gas and vapour atmospheres (zones 1 and 2).

- Many years of proven use in potentially explosive areas
- Light and compact design for easy mounting
- Diverse signalling options

Typical applications

Signalling of faults or alarms

- during the processing or filling of highly flammable substances (gases and/or vapours and liquids)
- during storage of highly flammable substances (gases and/or vapours and liquids)
- in industrial plants with flammable dust atmospheres (e.g. metal processing, sawmills, mills, powdered milk processing plants)

Installation options

- Wall mounting

Features

- For use with or without the use of a safety barrier (depend on product)
- Proven technology with ATEX and IECEx certifications

761:

- „E“ terminal box for easy connection; approved for use in gas and dust applications (zones 1 and 21)

Optical-audible combinations

Optical-audible combinations

Overview Optical and Audible Combinations

Double the safety with optical-audible signals

Large systems are often managed by only a few people, especially in automated production facilities and large machine shops. This results in optical signals not always being in the machine operator's immediate field of vision. In such cases, an audible signal may also be used. The use of both optical and audible alarms will help to counter an audible alarm not always being heard above an ambient noise level.

Installation Combination Beacon with Buzzer

Signalisation index	
Audible	
Continuous Tone	3
Optical	
LED Permanent Light	3

Your benefits

Optical audible Installation Combinations give excellent all-round visibility of the signal and are an industry standard for easy installation in control panels.

- Easy to install
- Tamper-proof when installed
- Minimal protrusion from panel for installations where space is limited
- Acknowledgement function promotes faster response time and fault repair (450 series)

Typical applications

Fault signalling

- in switch panels
- in control panels

Installation options

- Installation mounting

Features

- High IP65 protection rating for outdoor applications
- Standard M22 for control panel installation
- Proven piezo technology for extended life duration
- Easy to connect using a plug-in connection
- LED permanent light with continuous tone that can be additionally activated

LED Permanent light with continuous tone that can be additionally activated

i TECHNICAL SPECIFICATIONS/ORDER SPECIFICATIONS:

Dimensions (Ø x Height):	50 mm x 22 mm (Protrusion from panel)		
Housing:	PC/ABS-Blend		
Lens:	PC, transparent		
Connection:	Connector plug with screw terminal max. 1.5 mm ²		
Tone type:	Continuous		
Tone frequency:	C. 2,8 kHz		
Duty cycle:	100 %		
Life duration:	Up to 50,000 hrs		
Fixing:	Installation mounting for Ø 22.5 mm (M22 x 1.5 mm) with anti-twist device Nut and seal included in assembly.

gelb	450 300 55

! ADDITIONAL INFORMATION:

1

The occurrence of a malfunction or an error is indicated by means of an optical-audible signal.

2

The audible signal can be turned off in seconds by lightly pressing the front of the product.

3

The acknowledgement signal is sent to the control unit via an electronic switch and the malfunction is now only indicated by the optical signal.

Optical				
LED Permanent Light	3		3	
Xenon Flash		4		4

Your benefits

The WERMA Mini Beacon with a buzzer, siren or horn provides safety and security by providing a secure alarm warning in various applications. These optical-audible combination beacons are easy to install and connect, particularly when space is limited.

- Reliable signalling in close-range applications
- Tamper-proof when installed
- Multiple visual and audible escalation levels possible

Typical applications

Fault signalling

- In areas with low ambient noise levels
- On smaller sized machinery and equipment
- In building service systems (e.g. gas alarm, lift alarm)

Installation options

- Base mounting
- Wall mounting
- Tube mounting

Features

- Proven piezo technology for a long life duration
- Adjustable sound output
- Permanent light with long-lasting and energy-saving LEDs or as an eye-catching Xenon flashing light for high visibility

Base mounting

The adaptor (accessory) allows quick and simple mounting on a tube

Wall mounting

LED EVS Light		9		9

Your benefits

The WERMA Midi Beacon with a siren or horn provides safety and security by delivering reliable fault alarms over medium distances. The IP65 protection rating is suitable for outdoor applications.

- Multiple light configurations for different purposes and distances (some with partial external triggering)
- Simple installation
- Tamper-proof when installed
- Multiple visual and audible escalation levels possible
- Clear all-round visibility thanks to the OmniVIEW lens; no blind spots
- Multi-tone siren with up to 32 tones available for maximum flexibility

Typical applications

Fault signalling

- In areas with high ambient noise levels
- On machinery and equipment
- In building service systems (e.g. gas alarm)
- In the event of e.g. overload on mobile cranes and similar

Installation options

- Base mounting
- Wall mounting
- Tube mounting

Features

- Long life and energy-saving LEDs

Your benefits

The Design Combination LED Multi-Tone Sirens provide safety and security in environments with heightened aesthetic design requirements. The innovative housing design makes for simple mounting in many diverse applications.

- Ideal signalling effect over great distances
- Multiple visual and audible escalation levels possible
- Many application options with up to 32 tones available
- Up to 3 tones controlled remotely for the escalation of signals
- Includes standardised tones (including those used in fire alarms)

Typical applications

Fault signalling

- In building service systems
- On machinery and equipment

Installation options

- Wall mounting
- Base mounting
- Ceiling mounting

Features

- Multi-voltage versions allow multiple applications with a single device
- Long life and energy-saving LEDs, either as a flashing light or EVS

Heavy Duty Combination – Multi-Tone Siren with Xenon Flash

Size comparison Heavy Duty / Design

Signalisation index

Audible	439	441	442
Multi-Tone Sounder	6	8	10
Optical			
Xenon Flash	4	5	5-6

Your benefits

The WERMA Heavy Duty Combination - Multi-Tone Siren with Xenon Flash features a very robust housing. The combination device provides safety and security through reliable, loud signalling in particularly harsh environments. Up to 120 dB for use in extremely noisy environments and signalling over long distances.

- Multiple visual and audible escalation levels possible
- Includes standardised tones (including those used in fire alarms)
- Up to 42 tones for signalling various statuses

Typical applications

Signalling of faults or alarms

- Outdoors in extreme conditions
- In larger industrial plants
- As an evacuation alarm

Installation options

- Wall mounting

Features

- High protection rating IP66
- Multi-voltage versions available

439 Xenon Flash / Multi-Tone Sounder Combination (105 dB)
